The State Education Department does not discriminate on the basis of age, color, religion, creed, disability, marital status, veteran status, national origin, race, gender, genetic predisposition or carrier status, or sexual orientation in its educational programs, services and activities. Portions of this publication can be made available in a variety of formats, including braille, large print or audio tape, upon request. Inquiries concerning this policy of nondiscrimination should be directed to the Department's Office for Diversity, Ethics, and Access, Room 530, Education Building, Albany, NY 12234.

PREFACE

The "Analysis of School Finances in New York State School Districts" is an annual publication providing a meaningful perspective to staff in the Division of the Budget, the Legislature, the Education Department, and school officials concerning school expenditures, State Aid, and local support. This edition of the Analysis summarizes the finances of major school districts in school year 2012-13, as well as public school expenditures and State Aid since 1994-95.

In summarizing school district expenditures, the Analysis compares various percentiles of operating expenditures per pupil and describes the magnitude of the disparity in approved operating expenditures per pupil between districts in the 10th and 90th percentiles for each year. Also provided are decile tables ranked by wealth, expenditure per pupil and a need/resource index. These decile tables provide comparisons of school districts' expenditures per pupil, tax rates, and wealth per pupil.

Another feature of the Analysis is its presentation of five-year trend data on full value, expenditures, State Aid, tax rates, and local revenue. These items are displayed on a per pupil basis for the entire State, New York City and the rest of State (school districts outside New York City).

In terms of data collection, the total revenue from State sources displayed in the tables from 1994-95 through 2012-13 is the State Aid reported in the Annual Financial Report (Form ST-3) submitted by school districts. It should be noted that this data item may include prior year State Aid adjustment payments. Data for 2013-14 is based on State Aid payments to school districts and does not include some grants, prior year adjustments, and miscellaneous revenues from State sources. Total expenditures for 2013-14 are based on estimates provided by school districts. The 2012 Income data are as of October 2014. Other items contained in the Analysis are as of May 2014. School Tax Relief (STAR) revenue is also addressed in the report.

As in past years, an historical perspective of school finances in New York State is presented. Table 1 displays State Aid and total expenditures since 1994-95 and Appendix B contains data for school years 1940-41 through 1993-94.

To assist the reader less familiar with the technical terms used in the Analysis, a glossary of terms is provided at the end of the report.

I

THE FINANCING OF PUBLIC EDUCATION IN NEW YORK STATE

Introduction

The New York State commitment to elementary and secondary education, as measured by revenues to school districts from State sources, has decreased by \$1.68 billion or -6.6 percent, from \$25.31 billion in 2008-09 to \$23.63 billion in 2012-13. While this was occurring at the State level, school districts increased local tax revenue support by \$5.36 billion, a 19.8 percent increase over the same period. This overall revenue commitment by State and local governments (combined with a -\$0.14 billion or -5.4 percent decrease in federal aid) contributed to a total expenditure increase of \$3.53 billion or 6.4 percent during the period. The State's percentage of participation, presently at 40.5 percent (Table 1) for 2012-13, in the expenditures of school districts over the past 72 years has varied from a 2001-02 peak of 48.2 percent to a low of 31.5 percent in 1944-45 (Appendix B).

New York State's capacity to fund education has fluctuated over the years depending on State or national economic prosperity. A review of Table 1 and Appendix B reveals that State revenue has paralleled the State's economic climate. In the latter 1970's, the State provided relatively modest aid increases to schools caused in part by the economic adjustment to higher energy costs and inflation. As energy costs declined and economic activity within the State and nation rebounded, the State moved to incorporate new initiatives and continue support for excellence in education. Between 1983-84 and 1988-89, the State's economic climate was improving. This resulted in large increases in State revenue, about 10.7 percent annually. As a result, the State revenue portion of Total General and Special Aid Fund Expenditures rose to 44.2 percent for 1988-89. Due to a restructuring of the New York State Teachers' Retirement System (TRS) payments, this percentage declined to 41.6 percent for 1989-90. Even with \$257 million in reductions to local districts (1990-91 State Aid to school districts was initially reduced \$67 million due to restructuring of TRS and Employees' Retirement System payments and further reduced \$190 million due to the December 1990 Deficit Reduction Assessment), the 1990-91 percentage rose to 42.9 percent.

As a result of the State's \$6 billion budget deficit in 1991-92 and the imposition of \$926 million deficit reduction assessments against school aid the proportionate share of public school expenditures funded from State sources declined to 40.4 percent. The continuing poor economic climate in 1992-93 also resulted in a \$1.03 billion deficit reduction assessment against school aid, with the result that the State's share of public school expenditures declined to 39.1 percent in 1992-93. The State's share of public school expenditures continued to decline, to 38.0 percent, in 1993-94 with a -\$167 million net transition adjustment. In the years that followed, steady increases in State revenue have resulted in the State's share of total expenditures rising nearly every year through 2001-02. State revenue increased only slightly from 2001-02 to 2002-03, resulting in a drop in the State's share of expenditures from 48.2 percent in 2001-02 to 45.5 percent in 2002-03. The State's share of expenditures continued to decline through 2005-06 (see Figure 1). Phase-in to a new foundation aid formula (replacing operating aid) began in 2007-08, providing districts with an increase of \$1.1 billion and an increase in the State's share to 45.8 percent. The phase-in continued

in 2008-09 with a \$1.2 billion increase in foundation aid and an increase in the State's share to 46.8 percent, well above the 19-year average (1994-95 to 2012-13) of 43.0 percent.

School aid changed dramatically in 2009-10 with a downturn in the economy. As a result, 2009-10 foundation aid was held to 2008-09 amounts and a deficit reduction assessment of \$1,489 million was deducted from aid allocations. This continued, with 2010-11 and 2011-12 foundation aid held to 2008-09 amounts and gap elimination adjustments (GEA) of -\$2,138 million for 2010-11 and -\$2,556 million for 2011-12 further reducing the State's share of expenditures. Due to federal passage of the American Recovery and Reinvestment Act (ARRA) in 2009, New York State received \$3 billion over two years to help stabilize State and local budgets and ameliorate reductions in education. For 2009-10, the \$1,489 million reduction in State funding was entirely offset with ARRA state fiscal stabilization funds. For 2010-11, the GEA reductions were partially restored through the remaining ARRA funds of \$726 million and a new federal Education Jobs Program (passed in August, 2010) provided another \$607.6 million. After the school year began, 2010-11 aid payments to districts were further reduced by \$131.5 million. The GEA has continued: -\$2,156 million for 2012-13, -\$1,639 million for 2013-14; and, -\$1,037 million for 2014-15.

**Figure 1: Revenues from State Sources as a Percent of Total Expenditures
Total State**

Although final data for 2013-14 will not be available until next Summer, preliminary information in Table 1 shows that Total General and Special Aid Fund Expenditures for public elementary and secondary schools are expected to increase \$1.6 billion for 2013-14 to \$60 billion, a 2.7 percent increase over 2012-13. However, total State revenue including STAR in the same period is likely to increase by about \$1.22 billion, or 5.2 percent, to \$24.85 billion, resulting in a State share of 41.4 percent.

* For comparisons prior to the 1994-95 school year, the reader is referred to Appendix B of this report.

** Other than 1998-99 STAR, all revenues from State sources are as reported on the Annual Financial Report by school districts. Depending on local accounting methods, this may include prior year adjustments.

*** Total Expenditures include expenditures made from the Federal Aid Fund from 1965-66 to 1973-74 and from the Special Aid Fund since 1974-75. Includes expenditures from the Debt Service Fund, which was established in 1978-79. Beginning in 1983-84, some districts including New York City reported negative interfund transfers to the General Fund, tending to reduce actual expenditures.

**** Estimated.

The impact of the State revenue and total expenditure changes experienced during the last 20 years was further enhanced by enrollment declines which continued without interruption from 1973-74 until 1988-89. Enrollment increased steadily from 1989-90 until 2001-02 and has generally declined since then.

Table 2 accounts for these enrollment changes by depicting total expenditures and State revenues on a per enrolled pupil basis for school years 1994-95 to 2013-14. As Table 2 and Figure 2 illustrate, Total General and Special Aid Fund Expenditures per pupil increased from \$9,118 in 1994-95 to \$21,261 in 2012-13, a 133 percent increase over the entire period and an annual percentage increase per pupil of 4.8 percent. Increases in State revenue (including STAR starting in 1998-99) per pupil reflected a similar trend, increasing from \$3,594 in 1994-95 to \$8,599 in 2012-13, a 139 percent increase over the same time span, and an annual percentage increase of 5.0 percent.

The estimated 2013-14 Total General and Special Aid Fund Expenditures per enrolled pupil are \$21,811, an increase of \$550 (2.6 percent) over the 2012-13 school year. During this same period, State revenue including School Tax Relief (STAR) is expected to increase by \$434 per enrolled pupil to \$9,033, a 5.0 percent increase from the 2012-13 school year.

* See Glossary for definition.

** Includes School Tax Relief (STAR) starting in 1998-99.

*** Includes Debt Service Fund, which was established in 1978-79.

**** Estimated.

Table 3 contains a breakdown of total revenues and includes General and Special Aid Fund Revenues by funding source. State revenue, Federal revenue and local tax and other revenues are listed over the past 20 years. As noted in the table, State revenue includes School Tax Relief (STAR) which began in 1998-99. Revenues come primarily from local taxes and other revenues (55.5 percent in 2012-13) and State revenue (40.3 percent of total in 2012-13); Federal revenue was \$2.47 billion in 2012-13, which amounted to 4.2 percent of total revenues.

Table 3 and Figure 3 also show that Total General and Special Aid Fund Revenues increased from \$24.49 billion in 1994-95 to \$58.59 billion in 2012-13, an increase of 139 percent, while State revenue increased from \$9.83 billion to \$23.63 billion, or 140 percent over the same period. At the same time, local and other revenues increased from \$13.61 billion to \$32.49 billion, a 139 percent increase; Federal revenues increased from \$1.05 billion to \$2.47 billion, a 136 percent increase over this period.

Current estimates indicate that, due to the end of ARRA funding, Federal revenue will be approximately \$2.5 billion in 2013-14 and will comprise 4.2 percent of total revenues. It is estimated that the proportion of total revenues from State sources including School Tax Relief (STAR) will increase to 41.4 percent for the 2013-14 school year while amounting to \$24.85 billion. Local tax and other revenues are expected to increase by about \$0.21 billion to \$32.7 billion, and their proportionate share of total revenues will decrease by 1.0 percentage point to 54.5 percent.

* Includes School Tax Relief (STAR) starting in 1998-99.

** Includes the Debt Service Fund, which was established in 1978-79.

*** Estimated.

II

COMPARISONS OF PER PUPIL EXPENDITURES AND WEALTH BY DISTRICT RANK

Section II is designed to highlight the relationship between school district wealth and expenditure per pupil. A useful technique for portraying this relationship is first to rank order all districts in terms of their Approved Operating Expenditures per Total Aidable Pupil Unit for Expense (AOE/TAPU for Expense) from the lowest to the highest spending district. This array can then be split into 10 equally numbered groups, or deciles, and each of the expenditure deciles thus created can be described in terms of selected measures of district wealth as determined by Actual Value per Total Wealth Pupil Unit (AV/TWPU) and Income per Total Wealth Pupil Unit (Income/TWPU). The resulting decile tables (Tables 5 through 8) provide a quick comparison of school districts with similar approved operating expenditures per pupil and the degree to which changes in wealth are associated with changes in expenditure per TAPU.

Table 4 provides a comparison of AOE/TAPU for Expense, by selected district percentiles. As noted, Total Aidable Pupil Units (TAPU) was used for school years 1973-74 through 1979-80; and since 1980-81, TAPU for Expense, which includes weightings for students with disabilities, has been the pupil measure. The percentile values displayed (10th, 25th, 50th, 75th and 90th) are for all major school districts excluding New York City. New York City data are shown separately. Table 4 also displays the difference between the 90th and 10th percentiles, and the resulting expenditure gap expressed as a percent of the 10th percentile value. This expenditure gap measure can be viewed as a simple equality measure, with high values indicative of greater spending inequality among districts. As the last column of this table indicates, this expenditure gap generally decreased from 1993-94 until 1999-00, and, with few exceptions, has generally been increasing since the 2001-02 school year. At 84.4 percent, the 2001-02 expenditure gap is the smallest of the 19 years displayed. For 2012-13, the expenditure gap decreased to 92.0 percent.

Between the 2011-12 and 2012-13 school years, the median (50th percentile) district AOE per TAPU for Expense increased 4.3 percent or \$504. For the 10th percentile district, the change was an increase of \$404 or 4.2 percent; for the 90th percentile district, the per-pupil change was an increase of \$435 or 2.3 percent.

Over the 19-year period, the median approved operating expenditure per weighted pupil has increased by about 119 percent while the expenditure gap over the same period has increased by 100 percent.

In 1980-81, the method of computing the pupil count was changed to include weighted students with disabilities. Since there are a relatively large number of students with disabilities in New York City, this method of calculation has served to inflate New York City's pupil count, thus lowering their AOE per weighted pupil figures. New York City's AOE per pupil was below the median from 1994-95 through 1999-00 and fell below the 25th percentile in 1996-97. Since 2002-03, New York City's AOE per pupil is above the 50th percentile.

Table 4

* Weighted pupil count from 1973-74 to 1979-80, was TAPU; 1980-81 to present, TAPU for Expense (See Glossary for definitions).

** The value of the district at the percentile shown below is listed.

For Tables 5 through 8, districts were ranked respectively on Expenditure (AOE/TAPU for Expense), Property Wealth (AV/TWPU), Income Wealth (Income/TWPU) and a Need/Resource Index. Based on the ranking value for a given table, the State's 673 major districts (excluding New York City) were divided into ten decile groupings. (A district could conceivably be in a different decile group on each table.) Each table displays the highest value for each decile group on the ranking measure as well as the decile average for the ranking measure and eight other data measures, plus the 2012-13 enrollment (see Glossary for definition). State averages and New York City values for each data measure are also described at the bottom of each table.

The decile rankings of Tables 5, 6 and 7 permit the reader to compare individual school district information in a number of ways; it can be compared to other districts within its decile group, to other decile groups, or to the State average. For example, referring to Table 5, a district with a 2012-13 AOE/TAPU for Expense of \$13,000 would fall in the sixth expenditure decile (between \$12,329 and \$13,280). A district at or below \$9,971 would fall in the lowest spending first decile. With an AOE/TAPU for Expense of \$12,435, New York City would fall in the sixth decile, if the deciles had included New York City. The average AV/TWPU for the third AOE/TAPU for Expense decile grouping was \$340,329 and the average Total Expenditure/TAPU for Expense was \$14,881 for this same group of districts.

In a review of the three decile tables, attention should be drawn to the fact that all three ranking measures are positively skewed, since their respective State averages are heavily influenced by the extremely high values associated with districts in the ninth and tenth deciles. Thus, for example, the pupil weighted State average AOE/TAPU for Expense (including NYC) of \$13,000 shown in Table 5 falls into the sixth decile of expense, above the AOE/TAPU for Expense of the district at the 50th percentile of expense (\$12,329 per pupil). This is due to the pronounced effect of the more extreme per pupil spending patterns in the highest spending decile. This phenomenon is particularly pronounced in the case of Income/TWPU (shown in Table 7) since the statewide average of \$190,600 per pupil is well above the 50th percentile maximum value of \$127,267. Once again, this is attributable to the unusually high per pupil income of school districts in the tenth decile of income wealth where the average income per pupil (\$485,941) is more than 2.5 times the statewide average.

The School Tax Relief (STAR) program started in 1998-99. Tables 5, 6 and 7 show State revenue to school districts under the STAR program on a per-pupil basis. Generally, lower spending and lower wealth districts receive less STAR/TAPU for Expense, however this pattern is most pronounced in Table 7, which ranks districts based on Income/TWPU. Consistent with past issues of this report, Other Revenue from State/TAPU for Expense does not include State revenue for STAR.

For Table 8, districts are ranked using a Need/Resource Index. The need/resource index is designed to measure each district's (or decile's) student need in relation to its capacity to raise local revenues, indexed to State averages.

* Values shown are the weighted averages for all 67 or 68 districts with Income/TWPU less than or equal to the upper limit for the decile.

** Total Expenditure includes Debt Service and Special Aid Fund.

*** Other State Revenue does not include STAR.

Need is based on the Extraordinary Needs (EN) percent compared to the State average EN percent. The EN percent is a ratio of the sum of the poverty count (three-year average), sparsity count and limited English proficient pupils to the district enrollment. The EN percent was used to calculate Extraordinary Needs Aid from 1993-94 until 2006-07. Starting in 2007-08, a census poverty measure was added to the poverty count which had been based on a one-year free and reduced price lunch count. The Resource measure is based on the Combined Wealth Ratio (CWR), used in the calculation of Formula Operating Aid since 1984-85 and in the calculation of Foundation Aid starting in 2007-08. The CWR is based equally on property wealth per pupil compared to the State average and income wealth per pupil compared to the State average.

In order to measure each district's extraordinary student need relative to its wealth, the EN percent, compared to the State average, was divided by the Combined Wealth Ratio. The resulting index value was then used to array the 673 major districts in the State (excluding NYC) into the ten ascending decile groups in the table. Districts with relatively low needs and high resources will fall in the first decile (earlier pages in this chapter describe the use of deciles). Districts (or district decile groups) that serve relatively high percentages of students with Extraordinary Needs but have limited resources available to address the need (a low Combined Wealth Ratio) would have a very high need/resource index. Had New York City been included in the ranking, with an index of 1.396, it would fall into the sixth decile.

A review of the table indicates that high Need/Resource Index districts generally have lower property and income wealth than the State average. They generally spend (AOE and Total Expenditures per pupil) less than the State average and raise less per pupil in local tax revenue. High Need/Resource Index districts tend to receive less STAR revenue per pupil than low need districts. They receive more Other State Revenue per pupil than low need districts. Although the average Tax Rate of districts in the tenth decile is 99 percent of the State average, the average Tax Revenue per pupil raised by those districts is about 31 percent of the State average. Conversely, districts in the first decile tax at 86 percent of the State average but, on average, raise over twice as much Tax Revenue per pupil as the State average.

Table 9 compares Need/Resource Index deciles on changes from 2008-09 to 2012-13 in Total Wealth Pupil Units (TWPU), Actual Value per TWPU, and Income per TWPU. The ninth decile districts had the largest percent increase in AV/TWPU and the largest decline in TWPU. The first decile experienced the largest percent decrease in AV/TWPU and the largest percent increase in Income/TWPU. The sixth decile was the only one with an increase in TWPU, due largely to New York City's increase (see Table 14). Statewide, AV/TWPU decreased 6.35 percent and Income/TWPU increased 9.98 percent. Statewide, TWPU decreased 0.82 percent. In terms of the currency of the Market Value Standard used to convert locally assessed property values to a uniform full value standard during the reporting period: the 2008 standard was set at July 2007 (no gap) and the 2012 standard is July 2011 (no gap).

Table 10 compares Need/Resource Index deciles on changes in AOE/TAPU for Expense, Tax Revenue/TAPU for Expense and Tax Rate per \$1,000 of Actual Value for the 2008-09 to 2012-13 period. Tax Revenue and Tax Rate data from 1998-99 onward exclude STAR Revenue. Statewide, the Tax Rate increased 28.04 percent with the largest increase in the seventh decile districts and the smallest increase in the ninth decile districts. Statewide, over the four-year period AOE/TAPU for Expense increased 7.88 percent and Tax Revenue per TAPU for Expense increased

19.71 percent. The sixth decile districts had the smallest percent increase in AOE/TAPU for Expense and the largest percent increase in Tax Revenue per TAPU. As shown in Table 17, New York City had a 2.8 percent increase in AOE/TAPU for Expense, a 29.8 percent increase in Tax Revenue/TWPU and a 31.3 percent increase in Tax Rate. Table 15 shows that New York City had a 3.2 percent increase in Actual Value for this same time period.

Table 11 shows the wide range in school district expenditure patterns based on AOE/TAPU for Expense among the Need/Resource Index deciles of districts when compared to the statewide 25th percentile (\$10,843) and 75th percentile (\$15,662). The first decile contains by far the largest number and percent of school districts with AOE/TAPU for Expense above the 75th percentile; 62 of the 68 school districts, or 91 percent, had expenditures above the 75th percentile. This decile had no school district below the 25th percentile of spending. In most of the other deciles, the number of districts in excess of the 75th percentile was extremely small. Each of these deciles had substantially higher numbers of districts with AOE/TAPU for Expense less than the 25th percentile.

Table 12 displays the same per-pupil wealth, expenditure, revenue and aid data but by the 2008 Need/Resource-Capacity Categories (see Glossary) while Table 13 lists the number of districts in each category. The Big 4 Cities have the lowest average AV/TWPU, STAR Revenue per TAPU for Expense and Tax Revenue/TAPU for Expense however they have the highest average Other Revenue from State/TAPU for Expense. The per-pupil averages for Rural High Need districts and Urban/Suburban High Need districts are quite different for most of the measures shown in the table. Compared to the State averages, Average N/RC districts have lower wealth, spend less, receive less State revenue (other than STAR) and raise less tax revenue; they have a higher tax rate than the State average. Low N/RC districts' average AV/TWPU and Income/TWPU is 185 percent and 169 percent higher, respectively, than the State average. They receive 46 percent less Other State Revenue/TAPU for Expense than the State average but receive 157 percent more STAR Revenue per pupil. Their Tax Rate is 96 percent of the State average but they raise 175 percent more Tax Revenue per TAPU for Expense than the State average.

Table 13 shows the wide range in school district expenditure patterns based on AOE/TAPU for Expense among the 2008 Need/Resource-Capacity (N/RC) Categories of districts when compared to the statewide 25th percentile (\$10,843) and 75th percentile (\$15,662). The low N/RC category contains by far the largest number and percent of school districts with AOE/TAPU for Expense above the 75th percentile; 100 of the 135 school districts, or 74 percent, had expenditures above the 75th percentile. This N/RC category had 4 school districts below the 25th percentile of spending. Although the average N/RC Category contains half of the districts in the State, 104 of those districts (or 31 percent) had AOE/TAPU for Expense below the 25th percentile. Only 7 of the Rural N/RC districts had AOE/TAPU for Expense greater than the 75th percentile.

Statewide 75th percentile is \$15,662

III

FOUR-YEAR CHANGES IN SCHOOL FINANCES 2008-09 to 2012-13

This section contains longitudinal information concerning total pupils, key expenditure categories, school district taxes and other revenues, actual valuation and personal income. Each of these items of information is presented by Total State, New York City and Rest of State. Percent changes for year-to-year increments, as well as over the four-year period, are shown also. Table 14 contains five pupil counts. Table 15 contains gross financial amounts, which are then presented on a per-pupil basis in Tables 16 and 17. In this fashion, trends can be reviewed; State totals are analyzed including and excluding New York City. Data in Tables 14 through 17 include major districts only.

Over the four-year period, the Total Aidable Pupil Units (TAPU) for Expense, displayed in Table 14, have decreased 0.7 percent in the State. Although consistent in recent years, changes in the definition of TAPU make year-to-year comparisons of TAPU with enrollment difficult unless the changes in definition and their impact are reviewed (See Glossary for changes in definition). For example, a significant change in the 1992-93 pupil counts was the legislated change in definition to exclude students with disabilities attending private and State operated schools. All of New York City's pupil counts increased over the four-year period with the largest increase occurring in TAPU for Expense. Statewide, all five pupil counts decreased each year except for 2009-10. All pupil counts for Rest of State districts decreased over the four-year period.

Total General and Special Aid Fund Expenditures shown in Table 15 have increased by only 1.1 percent for Rest of State districts in 2012-13. In 2012-13, total expenditures increased 0.6 percent statewide. Over the four-year period, total expenditures increased 8.1 percent statewide and 10.1 percent in New York City.

Approved operating expenditures (AOE) over the four-year period increased 8.0 percent in New York City, and 6.2 percent in the Rest of State school districts. Statewide, approved operating expenditures increased only 1.0 percent in 2009-10 and 2010-11, followed by increases of 2.4 and 2.3 percent in 2011-12 and 2012-13.

Instructional expenses on a statewide level increased in each year until 2012-13, when they decreased 0.8 percent. New York City's instructional expenses increased 16.2 percent over the four-year period while Rest of State districts increased 7.6 percent. Statewide, instructional expenses increased 11.0 percent over the four-year period.

Statewide, debt service increased 16.0 percent over the past four years. Over the past four years debt service for New York City increased 11.9 percent, while Rest of State increased 17.7 percent.

From 2008-09 to 2012-13, Total Revenue from State sources (including STAR Revenue starting in 1998-99) decreased by 4.0 percent for Rest of State districts and decreased by 10.7 percent for New York City.

* Starting in 1992-93, all counts except DCAADM exclude students with disabilities attending private schools.

** TAPU for Expense is the one year TAPU with the weights prescribed in law for each year.

*** RWADA for 1988-89 and thereafter uses all attendance periods.

**** DCAADM, starting in 1990-91, includes resident students attending other public school districts. Starting in 2007-08, full-day pre-K enrollment is weighted at 1.0.

| New York City | \$737,073 | \$723,545 | -1.8 % | \$716,812 | -0.9 % | \$732,841 | 2.2 % | \$760,487 | 3.8 % | 3.2 % |
| Rest of State | 1,301,598 | 1,275,675 | -2.0 | 1,182,740 | -7.3 | 1,162,160 | -1.7 | 1,132,583 | -2.5 | -13.0 |
| Total State | 2,038,671 | 1,999,220 | -1.9 | 1,899,552 | -5.0 | 1,895,001 | -0.2 | 1,893,070 | -0.1 | -7.1 |

During the same 2008-09 to 2012-13 period, school district local tax and other revenues (excluding STAR starting in 1998-99) for non-New York City districts increased 11.4 percent, a total increase of approximately \$1.99 billion. Local tax and other revenues in New York City increased by 35.5 percent, or \$3.37 billion, over the same period.

Property value and income data form the basis upon which most State Aid to school districts is distributed. School districts having increases in actual value per pupil or income per pupil in excess of the State average would receive less formula operating aid per pupil. Between 1986-87 and 1991-92, the yearly percent increases in actual value registered in double digits. This steep increase was due to a general rise in property values and was also due in part to steps taken by the NYS Office of Real Property Tax Services to reduce the lag between the full value standard date and the assessment roll date that had been allowed to develop during the early 1980's. The lag was reduced incrementally from 54 months (in 1985) to 12 months (starting in 1993). The lag increased to 24 months for the 1996 actual value and dropped to 12 months for the 1997 actual value. Beginning with 1999 equalization rates, the lag drops to 0 months. There is an additional lag between the assessment roll date and the use of valuation data for school aid. For example, the 2008 assessment roll data converted to actual value on the basis of a July 2008 equalization rate standard were used in the calculation of 2012-13 aid, a 3.5 year lag from the full value standard of the rate to the aid year (2008 to 2012-13). Income data is more current, with 2009 calendar year income used for 2012-13 school aid. The 1996 legislation specified the use of 1994 actual value and income for 1997-98 aid in order to allow for the use of more final data for the State's budgeting purposes. This added one more year to the lag starting with 1997-98 school aid.

In 2012-13, actual value decreased an average of 0.1 percent for the year, while personal income increased 8.7 percent. In 2012-13, New York City's actual value increased 3.8 percent compared to a 2.5 percent decrease for Rest of State. Over the four-year period, personal income increased by 9.1 percent for the State and actual value decreased by 7.1 percent. For New York City, over the four-year period, personal income increased by 10.4 percent while actual value increased by 3.2 percent.

Table 16 displays per pupil (Duplicated Combined Adjusted Average Daily Membership) averages of the first six data elements contained in Table 15. Statewide, over the four-year period, Total General and Special Aid Fund Expenditures per Pupil increased 9.0 percent, Approved Operating Expenditures per Pupil increased 7.8 percent and Instructional Expense per Pupil increased 11.9 percent. Debt service per pupil decreased in New York City in 2010-11 and 2012-13 while, in the Rest of State, debt service increased each year. Total revenue from State sources (including STAR starting in 1998-99) per pupil for New York City decreased each year until 2012-13. The 7.7 percent statewide decrease in 2009-10 reflects the \$1,489 million deficit reduction assessment.

On a statewide-basis, over the four-year period, total State revenues per pupil decreased 5.8 percent while Total Expenditures per pupil increased 9.0 percent. Statewide, local tax and other revenues (excluding STAR starting in 1998-99) per pupil increased each year. Over the four-year period, local tax and other revenues per pupil increased 30.1 percent for New York City and 15.7 percent for Rest of State.

Table 17 also displays yearly per pupil averages based on the data elements contained in Table 15, but in this instance, by using pupil counts traditionally used for State Aid purposes. Personal income per TWPU increased by 10.0 percent over the four-year period. With the exception of 2011-12, the percent changes for New York City and Rest of State generally reflect the percent changes in personal income. Since 2008-09, New York City's average income per TWPU is higher than the State average.

New York City's average actual value per TWPU was lower than the State average each year. New York City's average actual value per RWADA was higher than the State average in each year. Over the four-year period, the State average actual value per TWPU and actual value per RWADA have both decreased 6.3 percent.

The New York City and Rest of State tax rate generally increased every year over the period. New York City's tax rate was lower than the State average except for 2009-10 and 2011-12. The State average tax rate increased 29.1 percent over the four-year period.

The percent increases in Approved Operating Expense per TAPU for Expense generally follow the trend in Approved Operating Expense per DCAADM shown in Table 16. New York City spent less than the State average in every year except for 2008-09.

Local tax and other revenues (excluding STAR starting in 1998-99) per TWPU increased 29.8 percent in New York City for the four-year period while Rest of State increased 16.1 percent. New York City's per pupil average was lower than the State average in each year.

GLOSSARY

Definitions Used in This Report

Actual Valuation of Taxable Real Property (AV): Total assessed valuation of property on the tax rolls within the district adjusted by the State equalization rate determined for such rolls. Data are obtained from the NYS Office of Real Property Tax Services, through the Office of the State Comptroller.

Adjusted Average Daily Attendance (AADA): Adjusted Average Daily Attendance is the same as Average Daily Attendance (ADA) except half-day kindergarten ADA is weighted at .50 and is an average for the school year. Unadjusted ADA is the unweighted ADA for the school year.

Approved Operating Expenditures (AOE): Approved Operating Expenditures (AOE) are the operating expenditures for the day-to-day operation of the school as defined in Education Law. Not included are expenditures for building construction, transportation of pupils, some expenditures made to purchase services from a Board of Cooperative Educational Services or County Vocational Education and Extension Board, tuition payments to other districts, and expenditures for programs which do not conform to law or regulation. Money received as Federal aid revenue, proceeds of borrowing, and State aid for special programs are first deducted from total annual expenditures when approved operating expenditures are computed. For 1989-90, AOE was adjusted to include the TRS expense that would have been incurred without restructuring. Starting with 1992-93, AOE excludes expenditures for students with disabilities in private and State operated (Rome and Batavia) schools.

Average Daily Attendance (ADA): This pupil count is the average number of pupils present on each regular school day in a given period, an average determined by dividing the total number of attendance days of all pupils by the number of days school was in session. ADA for a group of classes or schools in session for varying numbers of days is obtained by adding together the ADA for each group. In addition, adjustments are made for the adverse effects of religious holidays on attendance. Equivalent secondary attendance of students under 21 years of age who are not on a regular day school register is added to adjusted ADA in calculating TAPU and TWPU beginning in school year 1984-85. For students 21 years of age and older, refer to the definition of Employment Preparation Education Aid. Starting in 1992-93, the attendance of pupils attending private and State operated (Rome and Batavia) schools for students with disabilities is excluded from ADA. Starting in 1999-00, charter school pupils are added to ADA.

Debt Service: Debt Service is a combination of principal and interest on approved building projects, transportation issues and other debt instruments, both short- and long-term.

Deciles: Deciles are composed of 10 percent of the major school districts in New York State (for 2012-13, 67 or 68 school districts). The deciles exclude New York City. For example, decile 1 would contain the lowest 68 districts in a category; the value listed as the upper limit is the maximum value (10th percentile) for the group.

Duplicated Combined Adjusted Average Daily Membership (DCAADM): This pupil count consists of the average number of students receiving their educational program at district expense. It is the sum of: students enrolled in district programs (half-day kindergarten pupil weighted at 0.5); students with disabilities educated in BOCES full-time; students with disabilities educated in nonpublic schools including the State operated schools at Rome and Batavia; equivalent attendance; dual enrollment pupils; and prekindergarten enrollment weighted at 0.5. Since 1990-91, it includes resident students attending another public school. Since 1997-98, it includes incarcerated youth. Starting in 2007-08, full-day prekindergarten enrollment is weighted at 1.0 and half-day at 0.5.

Employment Preparation Education (EPE) Aid: Pupils 21 years of age and older who have not received a high school diploma or a high school equivalency diploma and attend employment education programs leading to a high school diploma or high school equivalency are eligible for aid under Employment Preparation Education (EPE). Aid is provided on a current year basis and is calculated based on the statewide average per pupil expenditure and an actual value aid ratio.

Enrollment/Enrolled Pupils: The total number of students entered on the roll as of the date in the fall on which data for the Basic Educational Data System are collected for the current year, including equivalent attendance and students attending full-time programs for the disabled in BOCES or nonpublic schools. In addition, prekindergarten and half-day kindergarten enrollments are weighted at 0.5. Since 1992-93, it excludes students attending private and State operated (Rome and Batavia) schools for students with disabilities. Starting in 1999-00, charter school pupils are added to enrollment. Starting in 2008-09, full-day prekindergarten enrollment is weighted at 1.0 and half-day at 0.5.

Evening School ADA: Evening School ADA was the ADA generated by half-day equivalent attendance in an approved program during the evening hours in school years prior to 1984-85 by individuals who were sixteen years of age or older. Such programs were approved by the Commissioner and lead to a high school diploma or its equivalent. The additional weighting for evening school pupils of .50 was in effect through 1984-85. (See the Average Daily Attendance definition above for attendance not on a regular day school register.)

Federal Revenue: All revenues received from the Federal Government directly or through the State Education Department in the Special Aid Fund and includes Job Training Partnership Act (JTPA) and other Federal revenues received in the General Fund. Federal revenues also include funding from: the 2009 American Recovery and Reinvestment Act; and, the 2010 Education Jobs Program (revenues from each may be recorded over more than one year).

Instructional Expense (IE): The calculation of IE, defined in subdivision 11-a of Section 3602 of Education Law and enumerated in Commissioner's Regulations 175.39 (revised 9/92), requires the summation of school district expenses which are identified in the Commissioner's Regulations as instructional plus a prorated share of fringe benefit expenses. Examples of the expenses included are: teachers' salaries, other instructional salaries, fringe benefits related to instruction, tuition expenditures, Special Aid Fund instructional expenditures, and other expenditures related to instruction, including BOCES instructional expenditures.

Local Tax and Other Revenues: Tax revenues are described below. Other revenues are any local funds other than real property taxes or non-property taxes such as a sales tax or utility tax; they may include interest income, fees, tuition, etc. Starting in 1998-99, STAR revenue is excluded.

Major School Districts: Major School Districts are school districts having eight or more teachers, exclusive of institutional (special act) school districts.

Minor School Districts: Minor School Districts are school districts with fewer than eight teachers, including those districts contracting 100 percent with other districts for the education of all their students, and institutional (special act) districts.

Need/Resource-Capacity (N/RC) Categories: Categories are determined from a need/resource-capacity index which is a measure of a district's ability to meet the needs of its students with local resources. Updated periodically, the index is the ratio of the estimated poverty percentage (expressed in standard score form) to the Combined Wealth Ratio (expressed in standard score form). A district with both estimated poverty and Combined Wealth Ratio equal to the State average would have a need/resource-capacity index of 1.0. For 2008, the estimated poverty percentage is a weighted average of the 2006-07 and 2007-08 kindergarten through grade 6 free- and reduced-price lunch percentage and the percentage of children aged 5 to 17 in poverty according to the 2000 Decennial Census. For 2008, the Combined Wealth Ratio is the ratio of district wealth per pupil to State average wealth per pupil, used in the 2007-08 Executive Budget proposal.

Pupils with Special Educational Needs (PSEN): The ADA of Pupils with Special Educational Needs is determined by multiplying the composite percentage of pupils scoring below minimum competence on the third- and sixth-grade reading and mathematics Pupil Evaluation Program tests by the district's combined adjusted ADA to produce the number of pupils for weighting. Prior to 1978-79, the average was based on the 1971 and 1972 sixth-grade reading and mathematics tests. From 1978-79 through 1984-85, the average was based on the 1974 and 1975 third- and sixth-grade reading and mathematics tests. Beginning in school year 1984-85, the average was based on tests administered in 1977, 1978, 1979 and 1980. Beginning in school year 1986-87, the average was based on tests administered in the Spring of 1983 and 1984. Beginning in school year 1988-89, the average was based on tests administered in the Spring of 1985 and 1986. The weighting for eligible pupils is .25 pupil units.

Resident Weighted Average Daily Attendance (RWADA): RWADA is calculated by subtracting the WADA of non-resident pupils attending public school in the district from the district's WADA and adding the WADA of pupils resident in the district but attending full-time a school operated by a Board of Cooperative Educational Services or a county vocational education and extension board, or another public school district.

Secondary School Pupil Weighting: Secondary school ADA not otherwise weighted are eligible for an additional weight of .25. Secondary PSEN ADA (pupils with special educational needs) are eligible for an additional weight of .15 beginning in 1978-79 and a weighting of .25 beginning in 1980-81. Beginning in school year 1988-89 (aid year), Big Five occupational education pupils are no longer excluded from the additional .25 weighting for secondary.

Small City Districts: Small Cities School Districts are fiscally independent school districts located entirely or mainly within a city which had a population of less than 125,000. Prior to 1986-87 these districts had tax limits of 1.25 percent, 1.50 percent, 1.75 percent, or 2.00 percent of the five-year average Full Value. A Constitutional Amendment enacted in 1985 eliminated, as of the 1986-87 school year, the tax limits for school districts in cities with population less than 125,000. Legislation enacted in 1997 allowed residents to vote on their school budgets.

Special Aid Fund: Since 1974-75, expenditures in this fund are for the majority of a school district's Federal funds for specific programs. Beginning with the 1987-88 school year, it also includes expenditures for certain State aid or grant programs. It includes expenditures for students with disabilities and for prekindergarten programs.

Students with Disabilities: Pupils resident of the district and attending special services or programs in public schools and BOCES, with additional weightings assigned as follows: pupils attending special services or programs 60 percent or more of the school day, 1.7; pupils in special services or programs 20 percent or more of the school week, .9; and pupils in special services or programs two periods or more of the school week, .13. Beginning with school year 1988-89 (aid year), pupils receiving direct and indirect consultant teacher services are assigned an additional .8 weighting; beginning in 1994-95 (aid year), their weighting is increased to .9. In 1998-99 (aid year), the .13 weighting was eliminated.

Summer School ADA: This is the ADA of pupils attending approved programs of instruction operated by the district during the months of July and August of the base year in accordance with the Commissioner's Regulations. The summer school weighting is .12.

Tax Rate: The tax revenue or local tax and other revenue divided by the actual valuation of real property, expressed as a rate per \$1,000 of actual valuation. Starting in 1998-99, STAR revenue is excluded.

Tax Revenues: Local revenues raised by taxation for school purposes, including property tax and non-property tax revenues. For the Big 5 City School Districts in the decile and other tables, and for New York City in general, tax revenue is Total General Fund Expenditures minus non-tax revenues. Starting in 1998-99, STAR revenue is excluded.

Total Aidable Pupil Units (TAPU): The pupil measure for Formula Operating Aid through the 2006-07 aid year. It includes combined adjusted ADA (weighted for half-day kindergarten), weighted pupils with special educational needs, weighted summer school pupils, dual enrollment pupils, and additional pupils weighted for secondary school. Aidable evening school pupils were included in TAPU through the 1984-85 school year. For Operating Aid from 1997-98 through 2006-07, one year older ADA, adjusted by an enrollment index, is used.

Total Aidable Pupil Units for Expense (TAPU for Expense): TAPU for Expense is used to compute the approved operating expense per pupil. This is the same definition as TAPU except it includes additional weightings for students with disabilities and does not use enrollment index-adjusted ADA.

Total General and Special Aid Fund Expenditures (Total Expenditures): These are the expenditures and transfers for the total school program from a district's Total General, Debt Service, and Special Aid Funds. For 1990-91 and 1991-92, the State aid withheld as a State share of local Teachers' Retirement System and Employees' Retirement System savings was excluded.

Total Personal Income: The adjusted gross personal income, including results from the school district income verification process, as reported by the Department of Taxation and Finance.

Total Revenue from State Sources: The sum total of all State aid paid to school districts pursuant to State Education Law, principally Sections 3602, 1950, 701, 711, 751 and 3609, and to related portions of the unconsolidated laws as reported on the Annual Financial Report (ST-3) by school districts. For 1990-91 and 1991-92, the State aid withheld as a State share of local Teachers' Retirement System and Employees' Retirement System savings was included. Starting in 1998-99, State revenues include School Tax Relief (STAR).

Total Wealth Pupil Units (TWPU): TWPU is based upon the AADA of pupils resident in the district plus additional weightings for PSEN, students with disabilities and secondary school pupils.

Wealth: School district wealth is determined by Actual Value per TWPU and/or Income per TWPU. Relative wealth can be calculated by dividing district Actual Value per TWPU by the State average and Income per TWPU by the State average. Wealth for computing Building, BOCES, Hardware and Transportation Aids is based on Actual Value per RWADA.

Weighted Average Daily Attendance (WADA): WADA is determined by applying the following weightings to the average daily attendance: half-day kindergarten, .50; full day kindergarten and grades one through six, 1.00; grades seven through twelve, 1.25. Beginning with 1988-89 data, the selection of best attendance periods (4 of 8, or 5 of 10) was eliminated.

APPENDIX A

HISTORIC CHANGES IN PUPIL UNITS

Pupil Units to Determine Expenditures Per Pupil: Pupil units used to compute expenditures per pupil have changed over the last decades.

Use of WADA Prior to 1974-75: Prior to school year 1974-75, expenditure per pupil was based on Weighted Average Daily Attendance (WADA) computed using full-time attendance in the best 4 of 8 or 5 of 10 attendance periods with half-day kindergarten weighted at .5 and secondary pupils at an additional .25.

TAPU Definitions from 1974-75 Through 1979-80: From 1974-75 to 1977-78, the pupil count was Total Aidable Pupil Units (TAPU) based on full year attendance plus half-day kindergarten weighted at .5; dual enrollment ADA; pupils with special educational needs (PSEN) weighted at an additional .25; summer school pupils at an additional .12; evening school at an additional .50; students with disabilities weighted at an additional 1.0; and secondary pupils not weighted as PSEN or students with disabilities at an additional .25. Pupils with special educational needs are determined based on third and sixth grade math and reading PEP tests. (See Glossary for year of test.)

In school years 1978-79 and 1979-80, pupil counts were based on TAPU except secondary school PSEN which had not previously received the secondary weighting including the PSEN, received an additional .15 secondary weighting. The PSEN weightings were based on 1974 and 1975 third- and sixth-grade math and reading PEP tests.

The 1980-81 school year was the first year of the new and separate formula for providing State aid for students with disabilities. Therefore, TAPU for payment of operating aid in school year 1980-81 did not contain a weighting for students with disabilities while the newly defined TAPU for Expense equaled TAPU plus the new weightings for students with disabilities. Secondary school PSEN received the PSEN weighting plus an additional .25 for secondary attendance.

Beginning in school year 1988-89, TAPU for payment was computed with occupational education pupils in Big 5 city school districts eligible for the additional .25 secondary weighting.

TAPU For Expense: Used since 1980-81 for measuring expense per pupil, a district's TAPU for Expense equals the sum of TAPU for payment of formula operating aid (which includes additional weightings as follows: PSEN at .25; secondary at .25; evening school at .5; summer school at .12); plus weighted students with disabilities (60 percent of the day, an additional 1.7; 20 percent of the week, an additional .9; 2 periods per week, an additional .13). TAPU for Expense is a one year pupil count even though TAPU for payment of operating aid may be a two-year average. For aid payable in 1984-85, TAPU and TAPU for Expense were computed based on PSEN weightings for third- and sixth-grade reading and mathematics PEP tests in the years 1977 through 1980.

For the 1984-85 school year, the additional .5 evening school weighting was applied to evening school pupils counted as contact hours/1,000. Thereafter, the evening school weighting was eliminated. Beginning with the 1984-85 school year, pupils under age 21 who were not on a regular day school register were counted as secondary pupils in the computation of ADA, based on

contact hours/1,000. The contact hours of individuals 21 years old and over attending programs leading to a high school diploma or equivalency diploma would be aided based on the new Employment Preparation Education Aid.

Beginning with school year 1988-89 (aid year), pupils receiving direct and indirect consultant teacher services are assigned an additional .8 weighting. Beginning in school year 1994-95 (aid year), their weighting is increased to .9.

PSEN weightings for school years 1986-87 and 1987-88 were based on third- and sixth-grade reading and mathematics PEP test scores, averaged for the years 1984-85 and 1984-85. These scores were used to determine weightings to be included in TAPU and TAPU for Expense. Beginning in school year 1988-89, the average was based on tests administered in the Spring of 1985 and 1986. The weighting for eligible pupils is .25 additional pupil units.

Beginning with school year 1993-94 (aid year), the attendance of pupils attending private and State operated (Rome and Batavia) schools for students with disabilities is excluded from Average Daily Attendance. Also, pupils attending private and State operated schools are excluded from receiving the additional 1.7 weighting.

For six years, beginning with school year 1997-98 (aid year), the TAPUs for the Rome, Plattsburgh and Peru school districts (districts experiencing pupil losses due to federal military base closings) are limited to decreases of no more than 2.5 percent from the prior year. The Laws of 2002, 2007 and 2012 extended this provision until June 30, 2007, June 30, 2012 and June 30, 2017, respectively.

In 1997-98 (aid year), the .13 weighting for students with disabilities was eliminated.

Charter schools were first allowed in 1999-00. To avoid negatively impacting TAPU and TAPU for Expense, charter school pupils are added to the basic pupil count (ADA).

Pupil Units to Compute District Wealth Per Pupil: The pupil units used to compute school district wealth prior to school year 1978-79 were based on Resident Weighted Average Daily Attendance (RWADA) computed based on the best 4 of 8 or 5 of 10 attendance periods of the district. Beginning with the 1990-91 aid year (1988-89 attendance), all attendance periods are used. This pupil count is based upon resident pupils with half-day kindergarten pupils weighted at .5 and secondary pupils weighted at 1.25. The difference between RWADA and WADA is: RWADA is resident pupils attending public school and WADA is based on attendance of resident and non-resident pupils. RWADA continues to be used to calculate Building, Hardware, Transportation and BOCES Aids.

In 1978-79, the pupil units used to compute wealth were Resident Total Aidable Pupil Units (RTAPU). This computation was like TAPU except that it was adjusted for residency by adding the full-time equivalent attendance of pupils residing in the district and attending other public schools, and subtracting such attendance for non-resident pupils attending district schools. Pupil weightings included were as follows: half-day kindergarten at .5; secondary at an additional .25; PSEN at an additional .25; students with disabilities at an additional 1.00; and, PSEN secondary at an additional .15. The PSEN weightings were based on third- and sixth-grade reading and mathematics PEP test score averages for 1974-75 and 1975-76.

In school year 1979-80, the RTAPU was changed to Total Wealth Pupil Units (TWPU) by using the best 7 of 8 or 9 of 10 attendance periods. Pupil weightings used in calculating RTAPU were continued in the calculation of TWPU.

In school year 1980-81, TWPU was adjusted by changing the PSEN secondary weighting to .25. Beginning with school year 1981-82, TWPU was further changed by adjusting the weighting for students with disabilities based on time in special services or programs as follows: 60 percent of the school day, an additional 1.7; 20 percent of the school week, an additional .9; and, two periods per week, an additional .13. Students with disabilities attending private schools were included and weighted at an additional 1.7. Beginning with school year 1988-89 (aid year), pupils receiving direct and indirect consultant teacher services are assigned an additional .8 weighting; beginning in 1994-95 (aid year), their weighting is increased to .9.

Beginning with school year 1984-85, PSEN weightings were based on third- and sixth-grade reading and mathematics PEP test scores averaged for the years 1977 through 1980. The definition of TWPU was also changed to include the equivalent secondary attendance of students under age 21 who are not on a regular day school register.

Beginning with the 1985-86 school year, TWPU was based on full year attendance.

For the 1986-87 and 1987-88 school years, PSEN weightings were based on third- and sixth-grade reading and mathematics PEP test scores, averaged for Spring 1983 and Spring 1984. These scores were used to determine weightings to be included in TWPU.

Beginning with the 1988-89 school year, PSEN weightings are based on third- and sixth-grade reading and mathematics PEP test scores, averaged for Spring 1985 and Spring 1986. These scores are used to determine weightings to be included in TWPU. Beginning with the 1988-89 school year, Big Five occupational education pupils are duplicated for secondary weighting.

Beginning with school year 1993-94 (aid year), the attendance of pupils attending private and State operated (Rome and Batavia) schools for students with disabilities is excluded from Average Daily Attendance. Also, pupils attending private and State operated schools are excluded from receiving the additional 1.7 weighting.

For six years, beginning with school year 1997-98 (aid year), the TWPU and RWADAs for the Rome, Plattsburgh and Peru school districts (districts experiencing pupil losses due to federal military base closings) are limited to decreases of no more than 2.5 percent from the prior year. The Laws of 2002, 2007 and 2012 extended this provision until June 30, 2007, June 30, 2012 and June 30, 2017, respectively.

In 1997-98 (aid year), the .13 weighting for students with disabilities was eliminated.

Charter schools were first allowed in 1999-00. To avoid negatively impacting TWPU and RWADA, charter school pupils are added to the basic pupil count (ADA).

In 2007-08 (aid year), enactment of the new Foundation Aid required creation of another wealth count, Total Wealth Foundation Pupil Units (TWFPU). TWFPU is based on resident adjusted Average Daily Membership (ADM) which weights half-day kindergarten ADM at .5 and eliminates additional weightings.

APPENDIX B

REVENUES FROM STATE SOURCES COMPARED TO TOTAL EXPENDITURES FOR PUBLIC ELEMENTARY AND SECONDARY SCHOOLS 1940-41 TO 1993-94

| School Year | Revenues from State Sources* | Total Expenditures** | Percent from State Sources |
|----------------|---------------------------------|-------------------------|-------------------------------|
| 1993-94 | \$9,065,208,519 | \$23,860,073,256 | 38.0 % |
| 1992-93 | 8,817,919,324 | 22,575,881,781 | 39.1 |
| 1991-92 *** | 8,659,401,410 | 21,412,274,440 | 40.4 |
| 1990-91 *** | 8,982,872,311 | 20,933,527,589 | 42.9 |
| 1989-90 **** | 8,036,519,519 | 19,333,012,175 | 41.6 |
| 1988-89 | 8,095,692,650 | 18,317,487,868 | 44.2 |

APPENDIX B (con't.)

REVENUES FROM STATE SOURCES COMPARED TO TOTAL EXPENDITURES FOR PUBLIC ELEMENTARY AND SECONDARY SCHOOLS 1940-41 TO 1993-94

| School Year | Revenues from State Sources* | Total Expenditures** | Percent from State Sources |
|-------------|------------------------------|----------------------|----------------------------|
| 1954-55 | 342,111,458 | 925,362,728 | 37.0 |
| 1953-54 | 300,616,864 | 821,271,032 | 36.6 |
| 1952-53 | 283,792,717 | 754,721,654 | 37.6 |
| 1951-52 | 271,893,281 | 686,883,519 | 39.6 |
| 1950-51 | 249,978,815 | 616,183,761 | 40.6 |
| 1949-50 | 239,305,992 | 563,376,271 | 42.5 |
| 1948-49 | 180,313,480 | 528,719,498 | 34.1 |
| 1947-48 | 154,718,759 | 477,887,493 | 32.4 |
| 1946-47 | 137,329,874 | 425,614,877 | 32.3 |
| 1945-46 | 120,916,352 | 378,143,894 | 32.0 |
| 1944-45 | 110,877,648 | 352,480,890 | 31.5 |
| 1943-44 | 111,813,743 | 347,016,624 | 32.2 |
| 1942-43 | 117,769,828 | 348,833,575 | 33.8 |
| 1941-42 | 118,765,954 | 356,183,375 | 33.3 |
| 1940-41 | 121,563,209 | 357,923,285 | 34.0 |

* Includes aid to New York City on a five-borough basis since 1968-69.

** Total Expenditures include expenditures made from the Federal Aid Fund from 1965-66 to 1973-74 and from the Special Aid Fund since 1974-75. Includes expenditures from the Debt Service Fund, which was established in 1978-79. Beginning in 1983-84, some districts including New York City reported negative interfund transfers to the General Fund, tending to reduce actual expenditures.

*** Annual Financial Report data was used; however, the State aid withheld as a State share of local Teachers' Retirement System and Employees' Retirement System savings, which resulted from the restructuring noted below, was charged against revenues rather than expenditures.

**** Legislation for 1989-90 reduced State aid by approximately \$684 million due to a restructuring of Teachers' Retirement System (TRS) payments for 1988-89 salaries. However, differences among districts in both accounting method used and payment schedule for the 1988-89 TRS salaries resulted in a total expenditure amount which includes about \$306 million in TRS expenditures.

***** Includes an additional one-half year's payment of \$51,857,477 to New York City for aid on a five-borough basis.

NOTE: Expenditures made from the Federal Aid fund are included in total expenditures from 1965-66 to 1973-74. State aid figures revised to exclude School Lunch and Breakfast aid since 1964-65 when the School Lunch expenditures and revenues were established as a separate fund.

SOURCE: Table 1, "State Aid to New York State School Districts, 1965-66," January 1967. School years 1963-64 through 1966-67 have been updated, and school years since 1966-67 have been added.

RE: Analysis of School Finances in New York State School Districts Report

Introduction: As you know, the purpose of the Analysis report is to accurately summarize major trends in school district finances over time and by major aggregation groups of interest to school district officials, policy makers and legislators. In order to improve the quality of this product, we have prepared a brief (1-page) survey, which we would ask you to complete. It should take no more than 5 minutes to complete. Won't you please take a moment or two to share your thoughts with us? Should you have any questions about the survey, do not hesitate to contact Ms. Darlene Tegza (518/473-8299).

Survey Questions:

1. **Have you or other members of your staff made use of the information contained in this report?** (Check appropriate box)

☐ NO --->And why is that? (Describe Briefly): _____

☐ YES --->And how did you make use of the report's information? (Describe Briefly):

2. **Are there any specific sections of the report which you found especially helpful or useful?** (Describe):

3. **Thinking now about the enclosed report overall, how would you rate it on a 1-5 scale (where "1" = excellent and "5"= very poor) in terms of the following dimensions? Circle the scale value that best reflects your judgement about each aspect of the report.**

| | Excellent | | | Very Poor | |
|--|-----------|---|---|-----------|---|
| <input type="checkbox"/> Clarity | 1 | 2 | 3 | 4 | 5 |
| <input type="checkbox"/> Utility | 1 | 2 | 3 | 4 | 5 |
| <input type="checkbox"/> Ease of Understanding | 1 | 2 | 3 | 4 | 5 |
| <input type="checkbox"/> Level of Detail | 1 | 2 | 3 | 4 | 5 |
| <input type="checkbox"/> Overall Quality | 1 | 2 | 3 | 4 | 5 |

NOTE: Please return (or fax) the survey form to the address (Fax #) shown above.
Thank you.
