Section 1                          GENERAL INFORMATION

PREFACE

The purpose of this Handbook is to provide information and guidance to those who coordinate and deliver related services and/or other special education programs and services to children with disabilities in the school districts and counties who participate in the New York State Medicaid Program. Throughout this document the term counties includes the City of New York. Handbook #9 includes information to help providers understand Medicaid program requirements and instructions regarding documentation requirements for completing and submitting Medicaid claims.

The information and instructions in Handbook 9 apply to all Medicaid claims for school supportive health services. Handbook 9 replaces Handbook 8 and incorporates all elements of the interim billing and claiming guidance that is posted on the Medicaid in Education website at http://www.oms.nysed.gov/medicaid/

Pertinent policy statements and requirements governing the Medicaid Program have been included in Handbook 9, which will serve as a central reference for updated information. Providers of preschool and school supportive health services are responsible for familiarizing themselves with all Medicaid regulations, policies and procedures currently in effect and as they are issued.

In addition to Handbook 9, primary sources of information about the Preschool/School Supportive Health Services Program, which is administered jointly by the New York State Education Department (SED) and the New York State Department of Health (DOH), are:

- Medicaid Alerts published by SED and DOH, which contain information regarding the provision of special education related services eligible for Medicaid reimbursement. Topics of Medicaid Alerts include the State Plan Amendment (SPA) for Preschool/School Supportive Health Services, updates on provider qualifications and updates on billing and claiming. Medicaid Alerts can be found on the Medicaid in Education website at: www.oms.nysed.gov/medicaid

- SSHSP Questions and Answers published by SED and DOH, which contain specific historical and current Medicaid policies and billing guidance related to the provision of, and available Medicaid reimbursement for, school supportive health services.

- NYS Education Department - Medicaid in Education Provider Support and Training (518) 474-7116 / medined@nysed.gov

- NYS Department of Health SSHSP Medicaid Policy and Medicaid Claiming Questions (518) 473-2160 / sshsp@health.ny.gov
Section 1  GENERAL INFORMATION

• NYS Office of the Medicaid Inspector General (OMIG) Compliance Program and Audit
  (518) 473-3782 (main office)

• CSRA (Formerly Computer Sciences Corporation)
  Provider Enrollment, Affiliation, Revalidation, and eMedNY assistance
  (800) 343-9000

• Medicaid Update, a monthly publication of DOH, which contains information regarding Medicaid programs, policy and billing. The Medicaid Update is ONLY available electronically. The newsletter is delivered monthly to your designated e-mail address in a Portable Document Format (PDF). To receive the Medicaid Update electronically, please send your e-mail address to:
  medicaidupdate@health.ny.gov
  or write to:
  Office of Health Insurance Programs
  NYS Department of Health
  Attention: Chelsea Cox
  99 Washington Avenue, Room 1706
  Albany, NY 12210

Past issues of Medicaid Update, organized by month, year and by topic, are available at:

The definitions, provider qualifications and documentation requirements included in this Handbook are for Medicaid reimbursement purposes only and may not correspond exactly to requirements for the provision of special education services as required by Federal and State law and regulations. Regardless of the requirements for Medicaid reimbursement, school districts and counties must provide special education services in compliance with Federal and State law and regulations.
Section 1  GENERAL INFORMATION

MISSION

To assist school districts and counties to provide quality healthcare to students with disabilities for certain diagnostic and health support services through accessing Medicaid reimbursement for eligible services and to prevent fraud, abuse, and false billing to the Medicaid Preschool and School Supportive Health Services Program while ensuring compliance with federal and State laws, regulations and guidelines.

HISTORY OF PRESCHOOL/SCHOOL SUPPORTIVE HEALTH SERVICES PROGRAM (SSHSP)

Traditionally, all costs provided by educational institutions have been funded through educational resources. In 1988, § 1903 of subdivision (c) of the Social Security Act (SSA), was added by § 411(k)(13)(A) of the Medicare Catastrophic Coverage Act of 1988 (PL 100-360). § 1903(c) clarified Congressional intent by stating that nothing in Title XIX of the SSA shall preclude Medicaid coverage of services included in the Individualized Education Program (IEP) of a student with a disability. This paved the way to supplement already allocated state and local educational monies earmarked for such services with Federal Medicaid dollars without impacting the State Medicaid Budget. New York State implemented the Federal Law in 1989 by amending §§ 368 (d) and (e) of the Social Services Law to authorize the then State Department of Social Services (SDSS) to make payment of Federal Medicaid Assistance (MA) funds for SSHSP services. The Department of Health is now the single state Medicaid agency responsible for oversight of the New York State Medicaid program.

In 2001, the Department of Justice (DOJ) and the Office of the Inspector General (OIG) initiated a federal investigation of a sample of programs in school districts, counties, and New York City as a result of litigation commenced by a whistleblower under the federal False Claims Act. This investigation provided the impetus for a statewide audit of New York’s School Supportive Health Services program by the OIG. Results of the audit recommended Medicaid disallowances of approximately $1.078 billion, not including interest. In July 2009, the State and New York City entered into an agreement with the federal Centers for Medicare and Medicaid Services (CMS), OIG and DOJ that called for restitution of approximately $539.75 million by the State and City. Terms of this settlement also included a Compliance Agreement that required the State to implement a Compliance and Integrity Program to prevent fraud, abuse, and false billing to Medicaid in its Preschool and School Supportive Health Services Program. Under the Compliance Agreement, the State was also required to submit a new State Plan Amendment (SPA) for CMS approval. The SPA details the nature and scope of Medicaid coverage and reimbursement including provider qualifications and encounter-based billing methodology. SPA #09-61 for the Preschool/School Supportive Health Services Program was approved by CMS on April 26, 2010 with a retroactive effective date of September 1, 2009.

The Preschool/School Supportive Health Services Program (collectively “SSHSP”) was developed jointly by the New York State Department of Health (DOH) and the New York State Department of Education (SED) to help school districts and counties obtain Medicaid reimbursement for certain diagnostic and health support services provided to students with disabilities. Specific services provided to school-age students from five years up to 21 years of age and to preschool students ages three to five years may be covered under SSHSP if all Medicaid requirements are met.
EARLY AND PERIODIC SCREENING, DIAGNOSIS, AND TREATMENT SERVICES (EPSDT)

School Supportive Health Services (SSHS) are services provided by or through school districts, and Preschool Supportive Health Services (PSSHS) are provided through counties in the State or New York City to children with disabilities who attend public or State Education Department approved schools or preschools. The services must be:

- Medically necessary and included in a Medicaid covered category in accordance with §1905(a), §1905(r)(5), and/or §1903(c) of the Social Security Act;
- Ordered or prescribed by a NYS Medicaid enrolled physician or other licensed practitioner acting within his or her scope of practice under New York State Law;
- Included in the student’s Individualized Education Program (IEP);
- Provided by qualified professionals under contract with or employed by a school district or a county in the State or the City of New York;
- Furnished in accordance with all requirements of the State Medicaid Program and other pertinent federal and State laws and regulations including those for provider qualifications, comparability of services, and the amount, duration and scope provisions; and
- Included in the State’s Medicaid plan in the Early and Periodic Screening, Diagnosis, and Treatment (EPSDT) services section.

A school district or county in the State or New York City must be enrolled as a Medicaid provider in order to bill Medicaid. Effective September 1, 2009, under State Plan Amendment #09-61, the services covered by the SSHSP for Medicaid eligible children under 21 who are eligible for EPSDT services that are medically necessary are included in Table 1.

MEDICAID PROVIDERS

For purposes of clarifying the term ‘provider,’ Medicaid claims can include three ‘providers.’ These are:

- **Ordering provider** - the NYS Medicaid enrolled, licensed and registered professional who has ordered or recommended services. Medicaid eligible ordering/referring providers include state licensed and currently registered physicians, physician assistants, nurse practitioners, speech-language pathologists, psychiatrists, and psychologists.

  Beginning with dates of service on and after May 1, 2013 the ordering/referring provider’s NPI must be identified on Medicaid claims submitted for reimbursement.

- **Attending provider** - the clinician who has the overall responsibility for the student’s medical care and treatment. In cases where the servicing provider (i.e., the clinician who provides services to the student on a regular basis) works “under the direction of” or “under the supervision of” a licensed clinician, the directing/supervising clinician is considered the “attending” clinician.

  Beginning with dates of service on and after January 1, 2012 the attending provider’s NPI must be identified on Medicaid claims submitted for reimbursement. The attending provider’s NPI must be identified on the electronic Medicaid claim when the attending provider and the servicing provider are not the same individual.

- **Billing provider** - the school district or county.

  The billing provider’s NPI must be identified on Medicaid claims submitted for reimbursement.

---

1 Please note that referrals for psychological evaluations and counseling services may be made by an appropriate school official or other voluntary health or social agency. School officials are not allowed nor required to enroll as a NYS Medicaid provider. See pages 41 and 46 for additional information.
HEALTH INSURANCE PORTABILITY AND ACCOUNTABILITY ACT (HIPAA)

The Health Insurance Portability and Accountability Act of 1996 (HIPAA) requires standards to be adopted in two areas;

1) Electronic health-care transactions (include standardizing the manner in which health services are claimed by any entity for any person in receipt of such a service), and

2) Privacy (confidentiality) of all health-related services provided. This involves protection of health information for anyone in receipt of such services.

School districts and counties, and Medicaid Service Bureaus submitting Medicaid data on their behalf to the electronic Medicaid system in New York State (eMedNY) are covered entities under this act. The electronic transmission of Medicaid data must be in a HIPAA-compliant format.

For more information about HIPAA please visit the US Department of Health and Human Services website at: http://www.hhs.gov/hipaa/index.html

THE FAMILY EDUCATIONAL RIGHTS AND PRIVACY ACT (FERPA)

The Family Educational Rights and Privacy Act (FERPA) (20 U.S.C. § 1232g; 34 CFR Part 99) is a federal law that protects the privacy of student education records. The law applies to all schools that receive funds under an applicable program of the U.S. Department of Education.

FERPA gives parents certain rights with respect to their children's education records. These rights transfer to the student when he or she reaches the age of 18 or attends a school beyond the high school level.

The Family Educational Rights and Privacy Act (FERPA), which is also known as the Buckley Amendment, is more restrictive than HIPAA with respect to the protection of privacy and security of all health related services. Because all school districts and counties are required to be in compliance with FERPA, they are also in compliance with HIPAA.

In order to assure compliance with FERPA (and thus with HIPAA), the following minimum procedures must be in place:

- All student data files and information must be protected (e.g., student files are locked or only accessible by appropriate personnel).
- Any student information/files transmitted to other appropriate recipients must also be protected. Information files must be encrypted and password protected.
- Student information/files may be faxed to appropriate personnel, but only to secure sites.
Section 3  CONFIDENTIALITY

- Parental consent is required for the release of any personally identifiable information other than those specifically excluded in 34 CFR §99.31.

- See Procedures for Transmission of Student Specific Information For Medicaid Billing Purposes on page 11 for all communications between school districts, counties, and SED/DOH pertaining to student-specific information.

For additional information, you may call 1-800-USA-LEARN (1-800-872-5327) (voice). Individuals who use TDD may call 1-800-437-0833.

Or you may visit the US Department of Education website at: http://www.ed.gov/policy/gen/guid/fpco/ferpa/index.html

Or you may contact the Family Policy Compliance Office at the following address:

Family Policy Compliance Office
U.S. Department of Education
400 Maryland Avenue, SW
Washington, D.C. 20202-8520
MEDICAID ELIGIBILITY DISCLOSURE POLICIES

New York State Education Department Policy

Confidentiality requirements mandate parental consent is given to the school districts and counties before the identity of a special education student can be released. See page 20 for parental consent requirements.

New York State Department of Health Policy

Schools and preschools may disclose Medicaid eligibility information to their health related services professional staff and providers with whom they contract when such information is necessary to administer the Medicaid State Plan for SSHSP.

Eligibility information provided to school districts and counties, therefore, may be shared with staff and other individuals associated with the agency that must provide the documentation required for claiming Medicaid reimbursement.
Section 3  
CONFEIDENTIALITY

PROCEDURES FOR THE TRANSMISSION OF STUDENT SPECIFIC INFORMATION FOR MEDICAID BILLING PURPOSES

To maintain security, all staff handling data with student identifying information, especially while seeking clarification on the processing of claims, must abide by the rules in this section. Staff includes, but is not limited to, employees and contracted staff of school districts and counties, State agencies, and other third party vendor staff.

Fax Transmissions

The sender should place the student last name, first name, date of birth and gender on a numbered line. This will allow the receiving staff to provide a response using only the number, without having to repeat the identifying information.

Call the receiver ahead of time to ensure immediate availability to retrieve the document. The intended receiver must provide the sender with a phone number for a fax machine that is located in a secure environment and not open to the general public.

E-Mail Transmissions

E-mail transmissions are permissible only if the data is encrypted and password protected. Information on encryption software is discussed later in this section.

Telephone

The telephone is preferable for small numbers of requests. Leave messages containing identifying data only on voice mail systems that are password protected.

Paper Documents

Printed documents may be mailed but be sure to mail only to a specific individual with the right to know. General addresses, where anyone can open the mail, are not appropriate.

Hand Delivered Files

Files and printed documents with personally identifying information may be hand delivered without encrypting the files. However, the information must be hand delivered to an appropriate individual with the right to know.

Files, Logs, Documentation or any Medium Containing Student Personally Identifiable Information

All files must be maintained in a secure environment which can only be accessed by appropriate staff that requires access to such information to carry out their work responsibilities. Information should not be left unattended. It should be locked or maintained where access would be denied.
Section 3  CONFIDENTIALITY

Encryption Information

School districts and counties may continue to use their current encryption software as long as it meets industry standards for security and privacy and is password protected. However, if you do not currently have encryption software you will need to purchase a package in order to meet FERPA requirements for security and privacy regarding the sending or transmitting of personally identifiable student information. SED does not recommend a particular software package or vendor. School districts or counties may pursue appropriate options, based on their existing infrastructure and support, and should involve their information technology support staff in deciding which option or software is in their best interest.

Note: HIPAA expressly excludes from HIPAA coverage any information maintained in school district educational records which are subject to the Family Educational Rights and Privacy Act (FERPA). Any questions regarding the above should be addressed to: MedinEd@nysed.gov
USE OF PUBLIC INSURANCE FUNDS FOR STUDENTS WITH DISABILITIES

The purpose of this section is to remind school districts and counties of the federal requirements relating to the use of public insurance funds for students with disabilities. Certain students with disabilities in NYS have access to public insurance. Federal regulations establish that a public agency may use a student’s Medicaid or other public insurance benefit programs in which a student participates to provide or pay for school supportive health services with the following limitations:

School districts and counties cannot:

- Require parents to sign up for or enroll in public insurance programs in order for their child to receive a free appropriate public education (FAPE) under Part B of the Individuals with Disabilities Education Act (IDEA);
- Require parents to incur an out-of-pocket expense such as the payment of a deductible or co-pay amount incurred in filing a claim for services, but may pay the cost that the parent otherwise would be required to pay; and
- Use a child’s benefits under a public insurance program if that use would:
  - Decrease available lifetime coverage or any other insured benefit;
  - Result in the family paying for services that would otherwise be covered by the public insurance program and that are required for the child outside of the time the child is in school;
  - Increase premiums or lead to the discontinuation of insurance; or
  - Increase premiums or lead to the discontinuation of insurance or a student’s eligibility for home and community-based waivers, based on aggregate health-related expenditures.

The use of Medicaid funds to provide or pay for school supportive health services through New York State’s Preschool/School Supportive Health Services Program will not:

- Require parents to incur an out-of-pocket expense;
- Decrease a child’s Medicaid benefits or available lifetime coverage; or
- Increase premiums or lead to the discontinuation of insurance or a student’s eligibility for home and community-based waivers.

Special Note: Section 5 of this Handbook provides detailed information regarding IDEA written parental consent requirements. In addition, parents must be informed that refusal to permit the school district or county to access public benefits or insurance does not relieve the school district or county of its responsibility to ensure that all required services are provided to students at no cost to parents.

Additional information regarding the use of public insurance is available at http://www.oms.nysed.gov/medicaid/parental_consent/

If you have any questions regarding the above requirements, please contact the SED Medicaid Unit at 518-474-7116 or MedinEd@nysed.gov.
THIRD PARTY HEALTH INSURANCE (TPHI) / MEDICAID MANAGED CARE

The existing Medicaid third-party liability regulations were designed to protect the government from paying for care that could otherwise be funded by private entities. However, there are two significant barriers to collecting payment from other health insurers for school supportive health services:

- private insurers do not recognize schools as health providers and have historically denied payment for services administered by schools, and
- the student’s right to a free appropriate public education (FAPE) does not impose any responsibility on the parent (or other legally responsible guardian) to agree to sign up for, or allow access to third party health insurance (TPHI) which might offset the school’s costs.

Given the above the pursuit of other third-party health insurance payment for SSHSP services would not be cost-effective and is unnecessarily burdensome. Therefore, Preschool/School Supportive Health Service Program (SSHSP) providers do not have to bill a student’s third party health insurance before Medicaid can be billed for SSHSP services.

Preschool/School Supportive Health Services are carved out (not included in) of the Medicaid Managed Care benefit package. This means that SSHS are billed to regular fee-for-service Medicaid for students enrolled in Medicaid Managed Care.

SECTION 504 STUDENTS

Medicaid reimbursement is not available for students receiving services from an Accommodation Plan in accordance with Section 504 of the Rehabilitation Act. Section 504 Accommodation Plans do not meet federal or State requirements for Medicaid reimbursement.
SUMMARY OF MEDICAID DOCUMENTATION REQUIREMENTS

In order to submit claims to the Medicaid program for SSHSP services, certain documentation requirements must be met. Some of the requirements listed in this section are solely federal/state education requirements (#1, #5, and #9) and others are both federal and/or State Medicaid/education requirements (#2, #3, #4, #6, #7, and #8). Effective September 1, 2009, billing for SSHS is encounter-based and a session note or other documentation (e.g., Medication Administration Record (MAR)) is required for each service (session) delivered to an eligible student. Required documentation listed here is explained further in this section. Items #1, #5, and #9 are not explicitly required for Medicaid billing purposes; however, they are required as part of the special education process. Items #2, #3, #4, #6, #7, and #8 are the documentation that must be on file for every student receiving school supportive health services in order to bill Medicaid.

In summary, necessary documentation includes:

1) Referral to the Committee on Special Education (CSE) and/or the Committee on Preschool Special Education (CPSE).¹

2) The Individualized Education Program (IEP). For Medicaid claiming purposes all SSHSP services including evaluations must be included in the student’s IEP.

3) Verification of current certification, licensure, and/or registration, as relevant, of clinician providing the service must be available upon request.

4) Provider Agreement and Statement of Reassignment completed by outside contractors, if applicable.

5) Parental Consent for Release of Information.

6) Written Orders/Referrals.

7) “Under the Direction of” or “Under the Supervision of” documentation, if applicable.

8) Documentation of each billable service:
   A. Evaluation report.
   B. Session note.
   C. Medication Administration Record (MAR).
   D. Special transportation logs.

9) Progress notes.

SSHSP document retention requirements are listed at the end of this section.

¹ Per Part 200 of the NYS Regulations of the Commissioner of Education
1) REFERRAL TO THE COMMITTEE ON SPECIAL EDUCATION (CSE) AND/OR THE COMMITTEE ON PRE-SCHOOL SPECIAL EDUCATION (CPSE)

§200.4 (a) Referral. A student suspected of having a disability shall be referred in writing to the chairperson of the district's committee on special education or to the building administrator of the school which the student attends or is eligible to attend for an individual evaluation and determination of eligibility for special education programs and services. The school district must initiate a referral and promptly request parental consent to evaluate the student to determine if the student needs special education services and programs if a student has not made adequate progress after an appropriate period of time when provided instruction as described in section 100.2(ii) of this Title.

2) INDIVIDUALIZED EDUCATION PROGRAM (IEP)

The IEP is the cornerstone of the special education process for each individual student with a disability. It is designed to enable a student with a disability to receive a free appropriate public education (FAPE) or to benefit from special education. It is the tool used to document how one student’s special needs related to his/her disability will be met within the context of an educational environment. For Medicaid claiming purposes, all school supportive health services, including evaluations, must be documented in the student’s IEP.

Each student with a disability must have an IEP in effect by the beginning of each school year. Federal and State laws and regulations specify the information that must be documented in each student’s IEP. In NYS, IEPs developed for the 2011-12 school year, and thereafter, must be on a form prescribed by the Commissioner of Education.

An IEP identifies a student’s unique needs and how the school will strategically address those needs. IEPs identify how specially designed instruction will be provided in the context of supporting students in the general education curriculum and in reaching the same learning standards as students without disabilities. IEPs guide how the special education resources of a school will be configured to meet the needs of the students with disabilities in that school. IEPs identify how students will be incrementally prepared for adult living. IEPs also provide an important accountability tool for school personnel, students and parents. By measuring students’ progress toward goals and objectives, schools should use IEPs to determine if they have appropriately configured how they use their resources to reach the desired outcomes for students with disabilities.

For additional information about IEP development and the required IEP form, refer to the following website: http://www.p12.nysed.gov/specialed/formsnotices/IEP/home.html

To be Medicaid reimbursable, SSHSP services must be included in the student’s IEP.
Section 5          SSHSP DOCUMENTATION REQUIREMENTS

3) VERIFICATION OF CURRENT CERTIFICATION, LICENSURE, AND/OR REGISTRATION AS RELEVANT

Providers of SSHSP services are required to meet certain qualifications as defined in the New York State Plan Amendment #09-61 and federal and State laws and regulations. It is the responsibility of Medicaid billing providers (school districts and counties) to verify qualifications prior to submitting claims for Medicaid reimbursement.

Verification of practitioner qualifications must be kept on file or be available if requested for audit purposes.

Verification of clinicians’ credentials can be done in various ways. Examples include:

- Request that practitioners submit documentation of current New York State certification, licensure and/or registration, as required, on an annual basis.

- Verify license and registration credentials on SED’s Office of Profession’s website at: [http://www.op.nysed.gov/opsearches.htm](http://www.op.nysed.gov/opsearches.htm)

- Verification of a teacher’s certification can be accessed through SED’s Teach Public Inquiry System online at: [http://eservices.nysed.gov/teach/certhelp/CpPersonSearchExternal.jsp?trgAction=INQUIRY](http://eservices.nysed.gov/teach/certhelp/CpPersonSearchExternal.jsp?trgAction=INQUIRY)

Reminder: Services rendered by certified teachers are not Medicaid reimbursable, with the exception of speech therapy rendered by certified teachers of the speech and hearing handicapped (TSHH) and certified teachers of students with speech and language disabilities (TSSLD) under the direction of a licensed and currently registered speech-language pathologist (SLP).

Licenses and PTA and OTA certificates are issued by the Office of Professions; all other certificates are issued by the Office of Teaching Initiatives.
4) PROVIDER AGREEMENT AND STATEMENT OF REASSIGNMENT

In order for school districts and counties to claim Medicaid reimbursement for services, they must have all private agencies, or service providers with whom they contract (other than a Board of Cooperative Educational Services (BOCES)), sign a Provider Agreement and a Statement of Reassignment. Specifically, if a school district or county contracts directly for a service such as transportation or speech therapy with an agency or person who is not an employee of the school district, county, or BOCES, that provider must have signed the Provider Agreement and the Statement of Re assignment. An independent agency may be an individual person or a corporation.

The Provider Agreement requires the contractor to “keep any record necessary to disclose the extent of services the Provider furnishes to recipients receiving assistance under the New York State Plan for Medical Assistance.”

The Statement of Reassignment requires the contractor “to reassign all Medicaid reimbursements to your school district [county] that you contracted with for providing medical services billed under the School Supportive Health Services Program.”

A Provider Agreement and Statement of Reassignment are needed from each contracted agency, but not from each individual service provider within the contracted agency. It is recommended that school districts and counties review these forms at the time of contract renewal.

The Provider Agreement and the Statement of Reassignment can be found at: http://www.oms.nysed.gov/medicaid/resources/
5) PARENTAL CONSENT FOR RELEASE OF INFORMATION

Medicaid Client Identification Numbers (CINs) may not be used to check Medicaid eligibility or for Medicaid billing of school supportive health services furnished to a student without first having a separate signed parental consent that meets IDEA and FERPA requirements in place.

State Education Department guidance on parental consent can be found online at: http://www.oms.nysed.gov/medicaid/parental_consent/
Section 5  

SSHSP DOCUMENTATION REQUIREMENTS

6) WRITTEN ORDER/REFERRAL

The written order/written referral (prescription) is the documentation that establishes medical necessity for the related service to be furnished and constitutes medical direction of the ordering professional. In order to bill Medicaid, a written order/written referral from a qualified Medicaid provider is required. Written orders/written referrals must be prospective and must be kept on file. Faxed copies of the written order/referral are acceptable.

The following elements **must** be included on a written order:

- The name of the child for whom the order is written;
- The complete date the order was written and signed;
- The service(s) being ordered. Note: The frequency and duration of the ordered service must be either specified on the order itself or the order can explicitly adopt the frequency and duration of the service in the IEP by reference;
- Ordering provider’s contact information (office stamp or preprinted address and telephone number);
- Signature* of a NYS Medicaid enrolled provider who is a NYS licensed, registered, and/or certified, as relevant, physician, physician assistant, or licensed nurse practitioner acting within his or her scope of practice, and
  - only for speech therapy services this also includes a NYS Medicaid enrolled provider who is a licensed and registered speech-language pathologist**
  - only for psychological evaluation and counseling services this includes a NYS Medicaid enrolled provider who is a licensed and registered psychologist, and/or an appropriate school official (school officials are not allowed nor required to enroll in NYS Medicaid);
- The time period for which services are being ordered;
- The ordering practitioner’s National Provider Identifier (NPI) or license number; and,
- Patient diagnosis and/or reason/need for ordered service(s).

* Please note that stamped signatures are not allowable. Electronic signatures affixed by someone other than the actual ordering/referring practitioner are also not allowable.

**For purposes of the SSHSP, where written referrals are permitted (e.g., speech therapy services, psychological counseling services), the written referral must include the information listed above.

It should be noted that the written order/written referral must be in place prior to the initiation of services (prospective), including evaluations.

18 NYCRR 515.2(b)(1)(c) states that an unacceptable practice is conduct which constitutes fraud or abuse and includes submitting, or causing to be submitted, a claim or claims for medical care, services or supplies provided at a frequency or in an amount not medically necessary. This means that SSHSP providers cannot bill Medicaid for services that are in excess of those specified on the written order/referral. If the frequency and duration of the ordered services are not explicitly stated, then there is no documentation of the determination of medical necessity for those services and therefore they cannot be billed to Medicaid.
Life of a Written Order/Referral

A written order/referral is required for Medicaid reimbursement for medically necessary services included in the IEP. The written order/referral for service(s) must be obtained whenever there is a change to a medically necessary service being furnished to a student pursuant to the student’s Individualized Education Program (IEP), this includes but is not limited to changes to the frequency or duration for the service(s), if the service changes from individual to/from group, and when the annual review is completed and the student’s next IEP is developed.

There must be a valid written order/referral annually or whenever there is a change in the services when Medicaid is being billed.

For example, a written order, dated 5/5/10, for physical therapy for the time frame of 7/1/10 - 6/30/11 is received by the Committee on Special Education (CSE). On 5/16/10 the CSE met and developed the IEP for the 2010/2011 school year and included physical therapy in the IEP for 3 sessions a week. After the student’s most recent physical therapy evaluation (November 2010), the CSE agreed to decrease services to 2 sessions a week. Because this is a change in both the IEP and treatment, a new written order must be obtained in order for Medicaid to be billed.

When a student with an IEP transfers from one district to another the new home district may adopt the student’s IEP from the prior district - for continuity of services - until they have an opportunity to hold a CSE meeting and develop a new IEP. In these instances, the existing IEP and written orders/referrals (that haven't expired, aren't over a year old) would still be considered valid for Medicaid reimbursement as long as all other Medicaid requirements are satisfied until such time that the existing written orders/referrals expire or the next IEP is written (whichever comes sooner).
7) “UNDER THE DIRECTION OF” AND “UNDER THE SUPERVISION OF”

To be Medicaid reimbursable, clinicians furnishing services must possess certain qualifications, including New York State licensure, registration, or certification as appropriate. For SSHSP purposes, the “under the direction of” requirements apply to speech teachers and therapy assistants in physical and occupational therapy as relevant, while the “under the supervision of” requirement applies to licensed master social workers (LMSWs). Licensed practical nurses (LPNs) must be under the direction of a licensed registered professional nurse (RN), physician, or other licensed health care provider authorized under the Nurse Practice Act. “Under the direction of” requirements are different for LPNs; additional information can be found in the SSHSP Questions and Answers that are posted on the Medicaid in Education webpage.

Occupational therapy assistants and physical therapist assistants must have direction from a licensed practitioner in their discipline, while teachers of the speech and hearing handicapped (TSHH) and teachers of students with speech and language disabilities (TSSLD) must receive direction from a licensed speech-language pathologist. Licensed master social workers (LMSWs) must receive supervision from a licensed and registered psychiatrist, psychologist, or licensed clinical social worker (LCSW). Supervision requirements applicable to LMSWs providing SSHSP services are defined by the State Education Department’s Office of the Professions and are located at http://www.op.nysed.gov/prof/sw/.

The various professionals who require direction/supervision to be qualified to provide school supportive health services are listed in tables on page 25. Provider qualifications are also summarized in the SSHSP Provider Matrix on pages 36 and 37. Section 6 of this Handbook provides greater detail about the qualifications necessary for clinicians’ services to be Medicaid reimbursable.

Licensed professionals are reminded that it is their responsibility to be aware of and adhere to any supervision requirements related to their profession, as outlined on the NYS Education Department Office of the Professions website. Such requirements may be changed from time to time. For example, in 2014 amendments were made to section 76 of the Regulations of the Commissioner of Education for occupational therapy, requiring the development of a written supervision plan, documentation of formal supervision requirements and contacts, and limiting the number of occupational therapy assistants that can be supervised.

Supporting documentation of the direction/supervision of staff rendering permissible SSHSP services requiring direction/supervision must be maintained and made available upon request for audit purposes. This documentation includes the attending provider signing and dating each session note that the servicing provider has completed within 45 days of the service. In addition, the attending provider must maintain documentation demonstrating that they have met SSHSP UDO/USO listed below and are consistent with their professional practice requirements.

“Under the direction of” (applies to PTA, OTA, TSHH, and TSSLD) means that the qualified practitioner (attending provider):

- Sees the student at the beginning of and periodically during treatment;
• Is familiar with the treatment plan as recommended by the referring physician or other licensed practitioner of the healing arts practicing under State law;
• Has input into the type of care provided;
• Has continued involvement in the care provided, and reviews the need for continued services throughout treatment;
• Assumes professional responsibility for the services provided under his or her direction and monitors the need for continued services;
• Spends as much time as necessary directly supervising services to ensure students are receiving services in a safe and efficient manner in accordance with accepted standards of practice;
• Ensures that providers working under his or her direction have contact information to permit them direct contact with the supervising (directing) therapist as necessary during the course of treatment;
• Keeps documentation supporting the supervision of services (including meetings and observations) and ongoing involvement in the treatment of each student.

“Under the supervision of” requirements apply only to licensed master social workers (LMSWs) and are described here.

Supervision of the psychological counseling services provided by the LMSW, with respect to each Medicaid beneficiary (student), shall consist of contact between the LMSW and supervisor during which:

• The LMSW apprises the supervisor of the diagnosis and treatment of each client;
• The LMSW’s cases are discussed;
• The supervisor provides the LMSW with oversight and guidance in diagnosing and treating clients;
• The supervisor regularly reviews and evaluates the professional work of the LMSW; and
• The supervisor is required to provide at least two hours per month of in-person individual or group clinical supervision.

Note: Refer to Medicaid Alert #15-04 for additional information on signature requirements for documentation of services provided involving UDO/USO. Medicaid Alert #15-04 is available online at: http://www.oms.nysed.gov/medicaid/medicaid_alerts/alerts_2015/home.html

8) **MEDICAID DOCUMENTATION OF EACH ENCOUNTER**

Documentation requirements to support Medicaid claims for therapy sessions, evaluations and re-evaluations, medication administration, and special transportation are described in this section.

**A) SESSION NOTES**

Service providers must maintain contemporaneous records. Session notes specifically document that the servicing provider delivered certain diagnostic and/or treatment services to a student on a particular date. Session notes must be completed by all qualified providers furnishing the services authorized in a student’s IEP for each Medicaid service delivered and must include:

- Student’s name
- Specific type of service provided
- Whether the service was provided individually or in a group (specify actual group size)
- The setting in which the service was rendered (school, clinic, other)
- Date and time the service was rendered (length of session – record session start time and end time)
- Brief description of the student’s progress made by receiving the service during the session
- Name, title, signature and credentials of the servicing provider and dated signature/credentials of supervising clinician as appropriate

The duties of the provider are discussed in Social Services regulation at 18 NYCRR § 504.3(a). Medicaid providers must prepare and maintain contemporaneous records that demonstrate the provider’s right to receive payment under the Medicaid program. “Contemporaneous” records mean documentation of the services that have been provided as close to the conclusion of the session as practicable. In addition to preparing contemporaneous records, providers in the Medicaid program are required to keep records necessary to disclose the nature and extent of all services furnished and all information regarding claims for payment submitted by, or on behalf of, the provider for a period of six years from the date the care, services or supplies were furnished or billed, whichever is later.

B) EVALUATIONS

Students without an IEP in place (initial evaluation)

An initial evaluation is the evaluation(s) that is done prior to the development of a student’s first Individualized Education Program (IEP). The initial evaluation(s) for psychological counseling, physical therapy, occupational therapy, and speech therapy are not Medicaid reimbursable unless an IEP is developed which includes a recommendation for ongoing services in the same therapy type for which the student was evaluated. In addition, all other Medicaid requirements must be met:

- The written order/referral (dated prior to the evaluation) must be on file,
- The evaluation must be provided by a Medicaid qualified provider,
- The evaluation must be documented, and
- The evaluation must be included in the IEP.

A written report must be completed at the end of each evaluation. The State’s IEP form includes an Evaluation Results section as a place to document the results of evaluations that were conducted and considered in the development of the student’s IEP. Alternatively, the Committee on Special Education (CSE)/Committee on Preschool Special Education (CPSE) could document its consideration of the evaluation and assessment results under the four need areas (academic achievement, functional performance and learning characteristics; social development; physical development; and management needs).

It is important to note that IDEA-driven evaluations are Medicaid reimbursable only for students determined to have a disability.

Students with an IEP in place

For students with an existing IEP, physical therapy evaluations, occupational therapy evaluations, speech therapy evaluations, and psychological evaluations are not Medicaid reimbursable unless the IEP will include a recommendation for ongoing services in the same therapy type for which the student was evaluated. These SSHSP evaluations are Medicaid reimbursable when ongoing services will be recommended based on the evaluation results (i.e., physical therapy services are recommended after the physical therapy evaluation) and all Medicaid requirements are met (see above).

RE-EVALUATIONS

A CSE is responsible for arranging an appropriate re-evaluation of a student with a disability. A re-evaluation must occur at least once every 36 months unless the parent and school district agree in writing that the re-evaluation is not necessary to provide current assessment information for a student in special education. In addition, the CSE/CPSE must arrange for a re-evaluation more frequently if the needs of the student warrant a re-evaluation or if requested by the student’s teacher or parent. A re-evaluation cannot be conducted more frequently than once a year unless the parent and school district representative on the CSE agree otherwise.

Discipline specific re-evaluations (e.g., physical therapy, occupational therapy, etc.) are also eligible for Medicaid reimbursement when the recommendation for the re-evaluation is included in the student’s IEP prior to the re-evaluation being conducted and all other Medicaid requirements are met (written order/referral, qualified provider, and documented) regardless of whether or not ongoing services of that same therapy type will continue to be included in the student’s IEP.
DOCUMENTATION

Documentation of an evaluation is the written report.

- The evaluation report must be completed at the end of each billable evaluation.
- An evaluation may take more than one session to complete, but only one unit is submitted on the claim when Medicaid is billed. The competed evaluation report date is the date of service billed to Medicaid.
- Date(s) of service (testing/gathering information for evaluation) must be reflected in the evaluation report.
- The evaluation report must be dated.
- The evaluation report must be signed.
START
Initial Evaluation Completed

CPSE/CSE meets

Was an IEP developed?

Y

Are ongoing services (in that same therapy type) included in the IEP?

N

END
Medicaid does not reimburse for an initial evaluation if an IEP is not developed.

END
Medicaid does not reimburse for an initial evaluation if ongoing services in the same therapy type are not included in the IEP.

END
The initial evaluation may be Medicaid reimbursable because ongoing services (in the same therapy type as the evaluation) are included in the IEP.

JANUARY 2012; reviewed March 2015
Section 5  SSHSP DOCUMENTATION REQUIREMENTS

C) MEDICATION ADMINISTRATION RECORD (MAR)

School nursing personnel should maintain accurate records of the medication administered, any special circumstances related to the procedure, and student’s reactions/responses. Nursing personnel must maintain an individual daily medication record for each student taking medication during the time frame medication is being given.

The medication log (MAR) must include:

- Student’s name and date of birth
- Grade/school
- Medication name, dosage, and route
- Order start date
- Order expiration date
- Prescriber’s name/telephone number
- Parent’s name/telephone number
- Date, time, and dosage of medication administered
- Signature and title of the person administering medication*

*If services are delivered by an LPN, the MAR does not need to be co-signed by the RN.

Nursing documentation should be accurate, objective, concise, thorough, timely, and well organized. All entries for paper records should be legible and written in ink that can be photocopied easily (black ink is recommended). The date and exact time should be included with each entry. A sample Medication Administration Record (MAR) can be found on pages 31 and 32.

D) SPECIAL TRANSPORTATION LOG

Special transportation recommended by the Committee on Special Education (CSE) and Committee on Preschool Special Education (CPSE) and identified on the students' IEP may be eligible for Medicaid reimbursement. Special transportation can only be billed on a day that a Medicaid reimbursable service (other than transportation) was delivered and may only be billed at the rate for each one-way trip.

Claims for Medicaid reimbursement for special transportation must be supported by the following documentation:

- The specific medical need for special transportation to accommodate the student's disability must be documented in the student's Individualized Education Program (IEP);
- An explanation as to how the transporting vehicle has been specially modified to serve the needs of that student with a disability must be documented in the IEP (see exceptions on page 50);
- The Medicaid reimbursable services to be delivered to the child must also be included in the child’s IEP;
- Session notes or other appropriate documentation for the Medicaid reimbursable service (other than transportation) delivered to the student.

The bus/transportation log must include:

- The student’s name;
- Both the origination of the trip and time of pickup;
- Both the destination of the trip and time of drop off;
- Bus number or the vehicle license plate number;
- The full printed name of the driver providing the transportation; and
  i. The driver’s signature attesting that the referenced trip was completed when Ambulette and Taxi/Livery services are provided by a contracted entity.

The full address of each origination and destination must be documented. However, this does not necessarily have to be recorded on each daily transportation log. For example, in a situation when routine special transportation services are provided from the student’s home to the school it is sufficient to use the terms ‘home’ and ‘school’ on the daily log and to document the full street addresses separately in the student’s record.

It is acceptable for the transportation log to indicate the actual time the first student was picked up and the actual time the last student was dropped off. For example, when the same bus is transporting the same students from their homes to the school in the morning the transportation log could indicate the time and place the first student is picked up and the time and place all the students are dropped off. The bus manifest and/or schedule may serve as documentation of the pickup locations and times in between the first pick up and the last drop off.

It is not necessary for the provider to create a separate special transportation log for each Medicaid eligible student.

These items are considered unacceptable documentation of a trip: a driver or vehicle manifest, or dispatch sheet; an issuance of prior authorization by the authorizing agent with subsequent checkmarks on a prior authorization roster; or an attendance log from the school or program.
Section 5  SSHP DOCUMENTATION REQUIREMENTS

9) PROGRESS NOTES

Quarterly progress notes are an IDEA requirement. Although they are not required for Medicaid reimbursement, practitioners must complete quarterly progress notes to fulfill documentation requirements under IDEA. This information is included here for convenience and to differentiate this requirement from the Medicaid program requirement for encounter-based contemporaneous session notes. Progress notes are completed, at a minimum quarterly, by the service provider and must include the progress the student is making towards his/her goals as indicated in the student’s IEP.

Appearance

The notes should address the goals set in the IEP and should describe how the student is reaching those goals. Progress notes containing one or two-word phrases do not adequately describe a student’s progress.

Frequency

Progress notes are required, under IDEA and Part 200 of the Commissioner’s Regulations, to be provided to parents at the time specified in the IEP. An annual review that contains progress notes by appropriate providers qualifies as one progress note.

Report of Progress

The IEP must identify when periodic reports on the progress the student is making toward the annual goals will be provided to the student’s parents (such as through the use of quarterly or other periodic reports that are concurrent with the issuance of report cards).
Section 517.3(b) of Title 18 NYCRR regulates audit and record retention for the NYS Medicaid program. As this section indicates, providers must retain records for a period of six years from the date the care, services or supplies were furnished or billed, whichever is later. The full text is included here for convenience:

18 NYCRR 517.3(b)(1) ... All records necessary to disclose the nature and extent of services furnished and the medical necessity therefore, including any prescription or fiscal order for the service or supply, must be kept by the provider for a period of six years from the date the care, services or supplies were furnished or billed, whichever is later.

In addition, student cumulative health records, which include treatment records, are to be kept until the student reaches the age of 27. The document recording records retention can be found at: http://www.archives.nysed.gov/a/records/mr_pub_ed1.pdf

Individual professions may have other documentation and record retention requirements in addition to the Medicaid program and education requirements noted. Clinicians can access discipline-specific record retention requirements on the Office of Professions website.
Section 6

SSHSP MEDICAID COVERED SERVICES

COVERED SERVICES

Included in the section of covered services are definitions, provider qualifications, and documentation requirements that are necessary to claim Medicaid reimbursement for the provision of certain diagnostic and health related support services provided to students with disabilities.

- Medical Evaluation
- Medical Specialist Evaluation
- Psychological Evaluation
- Audiological Evaluation
- Physical Therapy
- Occupational Therapy
- Speech Therapy
- Psychological Counseling
- Skilled Nursing
- Special Transportation

Note: These definitions, provider qualifications and documentation requirements are for Medicaid reimbursement purposes and may not correspond exactly to criteria for the provision of special education services as required by IDEA. School districts and counties must also be in compliance with the provisions of IDEA.

Section 6                  SSHSP MEDICAID COVERED SERVICES

MEDICAL EVALUATION

Definition

A medical evaluation is the recording of chief complaints; present illness; family history; past medical history; personal history and social history; a system review; a complete physical evaluation; the ordering of appropriate diagnostic tests and procedures; and a recommended plan of treatment.

Documentation needed for Medicaid reimbursement:

Medical necessity must be documented.

- A referral by the CPSE or CSE documented as part of the IEP process.

A referral for Medicaid reimbursement purposes in this instance is not a written referral separate from the IEP, but rather the Committee’s recommendation that a medical evaluation be conducted. The evaluation must be documented in the IEP.

Providers must be Medicaid qualified.

- NYS licensed and currently registered physician,
- NYS currently certified and registered physician assistant, or
- NYS licensed and currently registered nurse practitioner

Medicaid providers must be qualified in accordance with 42 CFR §§440.50(a), 440.60(a), and/or 440.166(a) and other applicable federal and State laws and regulations acting within their scope of practice under New York State law.

The encounter must be documented.

- Signed and dated medical evaluation or examination report must be available.

The evaluation must be included in the IEP.

- The Medical Evaluation must be reflected in the IEP.

In the “Present Levels of Performance” section of SED’s required IEP form, there is an Evaluation Results section. Results of evaluations that were conducted could be documented in this section.
MEDICAL SPECIALIST EVALUATION

Definition

A Medical Specialist Evaluation is an examination of the affected bodily area or organ system and other symptomatic or related organ systems; the ordering of appropriate diagnostic tests and procedures; the reviewing of the results and reporting on the tests and procedures; and, the reporting of findings, including test results and recommendations.

Documentation needed for Medicaid reimbursement:

Medical necessity must be documented.

- Written order that is signed and dated by a NYS Medicaid enrolled practitioner who is also a NYS licensed and currently registered and/or certified, as required: physician, physician assistant, or nurse practitioner.

Providers must be Medicaid qualified.

- NYS licensed and currently registered physician specialist,
- NYS currently certified and registered physician assistant specialist, or
- NYS licensed and currently registered nurse practitioner specialist

A Medicaid qualified specialist is a medical specialist practicing in the related area of specialization within his or her scope of practice under New York State law in accordance with 42 CFR §§ 440.50(a), 440.60(a), and/or 440.166(a) and other applicable federal and State laws and regulations.

The encounter must be documented.

- Signed and dated medical specialist evaluation or examination report must be available.

The evaluation must be included in the IEP.

- The Medical Specialist Evaluation must be reflected in the IEP.

In the “Present Levels of Performance” section of SED’s required IEP form, there is an Evaluation Results section. Results of evaluations that were conducted could be documented in this section.
Definition

Psychological evaluations include but are not limited to: administering psychological tests and other assessment procedures; interpreting testing and assessment results; and evaluating a Medicaid recipient for the purpose of determining the needs for specific psychological health or related services.

Documentation needed for Medicaid reimbursement:

Medical necessity must be documented.

- Written order or referral from a NYS Medicaid enrolled practitioner who is also a NYS licensed and currently registered and/or certified, as required: physician, physician assistant, or nurse practitioner; or an appropriate school official or other voluntary health or social agency (school officials are not allowed nor required to enroll in NYS Medicaid).

Providers must be Medicaid qualified.

- NYS licensed and currently registered psychiatrist, or
- NYS licensed and currently registered psychologist

Medicaid providers must be qualified in accordance with 42 CFR §440.60 or 42 CFR §440.50(a) and other applicable federal and State laws and regulations acting within their scope of practice under New York State law. Psychological evaluation services may only be provided by a professional whose credentials are equivalent to those of providers who are able to provide psychological evaluation services in the community.

The encounter must be documented.

- Signed and dated psychological evaluation report must be available.

The evaluation must be included in the IEP.

- The psychological evaluation must be reflected in the IEP.

In the “Present Levels of Performance” section of SED’s required IEP form, there is an Evaluation Results section. Results of evaluations that were conducted could be documented in this section.
Section 6                    SSHSP MEDICAID COVERED SERVICES

AUDILOGICAL EVALUATION

Definition

An audiological evaluation is the determination of the range, nature and degree of hearing loss including: measuring hearing acuity, tests relating to air and bone conduction, speech reception threshold and speech discrimination and other hearing evaluation tests as appropriate including conformity evaluations and pure tone audiometry, and, the reporting of findings, including test results and recommendations.

Medically necessary audiology services include but are not limited to: identification of children with hearing loss; determination of the range, nature and degree of hearing loss, including the referral for medical or other professional attention for the amelioration of hearing loss; and determination of the child’s need for amplification.

Documentation needed for Medicaid reimbursement:

Medical necessity must be documented.

- Written order that is signed and dated by a NYS Medicaid enrolled practitioner who is also a NYS licensed and currently registered and/or certified, as required: physician, physician assistant, or nurse practitioner.

Providers must be Medicaid qualified.

- NYS licensed and currently registered audiologist with a certificate of clinical competence (CCC) from the American Speech-Language-Hearing Association (ASHA)

Medicaid providers must be qualified in accordance with 42 CFR §440.60(a) and 42 CFR §440.110(c)(3) and other applicable federal and State laws or regulations, acting within their scope of practice under New York State law.

The encounter must be documented.

- Signed and dated audiological evaluation or examination report must be available. The completed report date is the date of service for the Medicaid claim. An evaluation may take more than one session to complete, but only one unit of service is submitted on the Medicaid claim.

The evaluation must be included in the IEP.

- The audiological evaluation must be reflected in the IEP.

In the “Present Levels of Performance” section of SED’s required IEP form, there is an Evaluation Results section. Results of evaluations that were conducted could be documented in this section.
PHYSICAL THERAPY

Definition

Physical therapy services include but are not limited to:

- Identification of children with physical therapy needs;
- Evaluation for the purpose of determining the nature, extent and degree of the need for physical therapy services;
- Provision of physical therapy services for the purpose of preventing or alleviating movement dysfunction and related functional problems;
- Obtaining, interpreting, and integrating information appropriate to program planning;
- Diagnosis and treatment of physical disability, injury or disease using physical and mechanical means, including but not limited to: heat, cold, light, air, water, sound, electricity, massage, mobilization and therapeutic exercise with or without assistive devices; and
- The performance and interpretation of tests and measurements to assist pathopsychological, pathomechanical, and developmental deficits of human systems to determine treatment and assist in diagnosis and prognosis.

The term “services” is defined as including both evaluations and ongoing therapy. Physical therapy services may be provided in an individual or group setting.

Documentation needed for Medicaid reimbursement:

Medical necessity must be documented.

- Written order that is signed and dated by a NYS Medicaid enrolled practitioner who is also a NYS licensed and currently registered and/or certified, as required: physician, physician assistant, or nurse practitioner.

Providers must be Medicaid qualified.

- NYS licensed and currently registered physical therapist, or
- NYS certified physical therapist assistant “under the direction of” a qualified NYS licensed and currently registered physical therapist.

Medicaid providers must be qualified in accordance with the requirements of 42 CFR §440.110(a) and with applicable federal and State laws and regulations, acting within their scope of practice under New York State law.

The encounter must be documented.

- Evaluation: Signed and dated physical therapy evaluation report must be available. The completed report date is the date of service for the Medicaid claim. An evaluation may take more than one session to complete, but only one unit of service is submitted on the Medicaid claim.

- Ongoing Therapy: Contemporaneous session note for each encounter.

The service must be included in the IEP.
OCCUPATIONAL THERAPY

Definition

Occupational therapy services include but are not limited to:

- Identification of children with occupational therapy needs;
- Evaluation for the purpose of determining the nature, extent and degree of the need for occupational therapy services;
- Improving, developing or restoring functions impaired or lost through illness, injury, or deprivation;
- Preventing through early intervention, initial or further impairment or loss of function; and
- Planning and utilization of a program of activities to develop or maintain adaptive skills designed to achieve maximal physical and mental functioning of the student in daily life tasks.

The term “services” is defined as including both evaluations and ongoing therapy. Occupational therapy services may be provided in an individual or group setting.

Documentation needed for Medicaid reimbursement:

Medical necessity must be documented.

- Written order that is signed and dated by a NYS Medicaid enrolled practitioner who is also a NYS licensed and currently registered and/or certified, as required: physician, physician assistant, or nurse practitioner.

Providers must be Medicaid qualified.

- NYS licensed and currently registered occupational therapist; or
- NYS certified occupational therapy assistant (OTA) “under the direction of” a qualified licensed and currently registered occupational therapist

Medicaid providers must be qualified in accordance with the requirements of 42 CFR §440.110(b) and with applicable federal and State laws and regulations, acting within their scope of practice under New York State law.

The encounter must be documented.

- Evaluation: Signed and dated occupational therapy evaluation report must be available. The completed report date is the date of service for the Medicaid claim. An evaluation may take more than one session to complete, but only one unit of service is submitted on the Medicaid claim.
- Ongoing Therapy: Contemporaneous session note for each encounter.

The service must be included in the IEP.
Speech therapy services include but are not limited to:

- Identification of children with speech disorders;
- Diagnosis and appraisal of specific speech disorders;
- Referral for medical or other professional attention necessary for the habilitation of speech disorders;
- Provision of speech or language services for the habilitation or prevention of communicative disorders;
- Evaluation and application of principles, methods and procedures of measurement, prediction diagnosis, testing, counseling, consultation, rehabilitation and instruction, related to the development of disorders of speech, voice, and/or language, and
- Preventing, ameliorating or modifying speech disorder conditions in children and/or groups of children.

The term “services” is defined as including both evaluations and ongoing therapy. Speech therapy services may be provided in an individual or group setting.

**Documentation needed for Medicaid reimbursement**

**Medical necessity must be documented.**

- Written order that is signed and dated by a NYS Medicaid enrolled practitioner who is also a NYS licensed and currently registered and/or certified, as required: physician, physician assistant, or nurse practitioner; or
- Written referral that is signed and dated by a NYS Medicaid enrolled practitioner who is also a NYS licensed and currently registered speech-language pathologist.

**Providers must be Medicaid qualified.**

- NYS licensed and currently NYS registered speech-language pathologist;
- Teacher of the speech and hearing handicapped (TSHH) or teacher of students with speech and language disabilities (TSSLD) certified to provide speech therapy services “under the direction of” a qualified NYS licensed and currently registered speech-language pathologist.

Medicaid providers must be qualified in accordance with the requirements of 42 CFR § 440.110(c) and applicable federal and State laws and regulations acting within their scope of practice under NYS law.

**The encounter must be documented.**

- Evaluation: Signed and dated speech therapy evaluation report must be available. The completed report date is the date of service for the Medicaid claim. An evaluation may take more than one session to complete, but only one unit of service is submitted on the Medicaid claim.
- Ongoing Therapy: Contemporaneous session note for each encounter.

**The service must be included in the IEP.**
Section 6

SSHSP MEDICAID COVERED SERVICES

PSYCHOLOGICAL COUNSELING

Definition

Psychological counseling services include treatment using a variety of techniques to assist the child in amelioration of behavioral and emotional problems that are severe enough to require treatment.

Psychological counseling services may be provided in an individual or group setting.

Documentation needed for Medicaid reimbursement:

Medical necessity must be documented.

- A written order/referral from a NYS Medicaid enrolled practitioner who is also a NYS licensed and currently registered and/or certified, as required: physician, physician assistant, or nurse practitioner; or a written referral from an appropriate school official or other voluntary health or social agency(school officials are not allowed or required to enroll in NYS Medicaid).

Providers must be Medicaid qualified.

- NYS licensed and currently registered psychiatrist,
- NYS licensed and currently registered psychologist,
- NYS licensed clinical social worker (LCSW), or
- NYS licensed master social worker (LMSW), “under the supervision of” a NYS licensed clinical social worker (LCSW), a NYS licensed and currently registered psychologist, or a NYS licensed and currently registered psychiatrist

Medicaid providers must be qualified in accordance with the requirements of 42 CFR §§ 440.60(a) or 440.50(a) (2) and applicable federal and State laws and regulations acting within their scope of practice under New York State law.

Psychological counseling services may only be billed to Medicaid if provided by a professional whose credentials are comparable to those of providers who are able to furnish psychological counseling services in the community.

The encounter must be documented.

- Contemporaneous session note for each encounter.

The service must be included in the IEP.
Section 6  SSHSP MEDICAID COVERED SERVICES

SKILLED NURSING

Definition

Skilled nursing services include but are not limited to:

- Health assessments and evaluations;
- Medical treatments and procedures;
- Administering and/or monitoring medication needed by the student during school hours; and
- Consultation with licensed physicians, parents and staff regarding the effects of the medication.

Skilled nursing services eligible for Medicaid reimbursement only include those medically necessary services the student requires to remain in school in order to benefit from special education services. Medicaid reimbursement is available only for skilled nursing services that are episodic in nature, rather than full-day 1:1 nursing.

The phrase “skilled nursing services” must be included on the student’s IEP and the specific skilled nursing services or medications should not be listed on the IEP. The specific skilled nursing services or medications should be recorded in the student’s individualized health care plan (IHCP). Please see Medicaid Alert #15-02 for additional information.

An IHCP developed by a registered professional nurse (RN), is a plan of nursing care for a child with health needs. It is not required by law, but is customarily used in nursing practice and is recommended for all students with special health care needs.

**Documentation needed for Medicaid reimbursement:**

**Medical necessity must be documented.**

- Written order that is signed and dated by a NYS Medicaid enrolled practitioner who is also a NYS licensed and currently registered and/or certified, as required: physician, physician assistant, or nurse practitioner.

**Providers must be Medicaid qualified.**

- NYS licensed and currently registered professional nurse, or
- NYS licensed and currently registered practical nurse under the direction of a NYS licensed and currently registered professional nurse, physician, physician assistant, dentist or other licensed health care provider legally authorized under the Nurse Practice Act
Medicaid providers must be qualified in accordance with the requirements of 42 CFR §440.60(a) and other applicable federal and State laws and regulations acting within their scope of practice or a New York State licensed practical nurse qualified in accordance with 42 CFR §440.60(a) and other applicable federal and State laws or regulations acting within his or her scope of practice “under the direction” of a licensed registered professional nurse, or licensed physician, dentist, or other licensed health care provider authorized under the Nurse Practice Act.

**The encounter must be documented.**

- Medication administration: Medication Administration Record (MAR)
- Skilled nursing services: Contemporaneous session note for each encounter.

Note: If services are provided by an LPN, the MAR or session note does not need to be co-signed by an RN.

**The service must be included in the IEP.**
Section 6  

SSHSP MEDICAID COVERED SERVICES

SPECIAL TRANSPORTATION

Definition

Special transportation is provided when a student requires specialized transportation equipment because of his/her disability as cited in 34 CFR § 300.34(c)(16)(iii).

With some exceptions, Medicaid reimbursable special transportation is limited to those situations where the student receives transportation in a vehicle modified to accommodate the student’s disability to obtain a Medicaid-covered service (other than transportation), or returns from a Medicaid-covered service.

The New York State Education Department (NYSED) field memorandum, dated March 2005, titled Special Transportation for Students with Disabilities, is NYSED’s guidance to be used when determining the need for special transportation services when developing an IEP. This memo reflects special education policy only, and cannot be used to determine if or when special transportation is Medicaid reimbursable. The memorandum can be viewed at: http://www.oms.nysed.gov/medicaid/services/transportation/Cort_Special_Transportation.pdf

Documentation needed for Medicaid reimbursement:

Medical necessity must be documented.

- The specific medical need for special transportation to accommodate the student’s disability must be documented in the student’s Individualized Education Program (IEP); and
- An explanation as to how the transporting vehicle has been specially modified to serve the needs of that student with a disability must be documented in the IEP (see exceptions on page 51)
  - A specially modified vehicle is one where the vehicle has a physical feature to accommodate a specific student with a disability. A bus with a wheelchair lift is an example of a specially modified vehicle. Examples that do not qualify a vehicle as a specially modified vehicle for purposes of Medicaid reimbursement include the following:
    - Air conditioning;
    - Seat belts or harnesses;
    - A bus aide; or
    - Installed video equipment.

Providers are Medicaid qualified.

- Special transportation services must be provided by a vendor who is legally authorized to provide transportation services on the date the services are rendered.

The encounter must be documented.

- Bus/transportation log for each one-way trip:
  - Student’s name;
  - Both the origination and time of pick up for each trip;
  - Both the destination and time of drop off for each trip;
Section 6  
SSHSP MEDICAID COVERED SERVICES

- Bus number or vehicle license plate number;
- The full printed name of the driver providing the transportation; and
  - The driver’s signature attesting that the referenced trip was completed when Ambulette and Taxi/Livery services are provided by a contracted entity.

It is acceptable for the transportation log to indicate the actual time the first student was picked up and the actual time the last student was dropped off. For example, when the same bus is transporting the same students from their homes to the school in the morning the transportation log could indicate the time and place the first student is picked up and the time and place all the students are dropped off. The bus manifest and/or schedule may serve as documentation of the pickup locations and times in between the first pick up and the last drop off.

It is not necessary for the provider to create a separate special transportation log for each Medicaid eligible student.

These items are considered unacceptable documentation of a trip: a driver or vehicle manifest, or dispatch sheet; an issuance of prior authorization by the authorizing agent with subsequent checkmarks on a prior authorization roster; or an attendance log from the school or program.

The service must be included in the IEP.

- The IEP must include specific transportation recommendations to address each of the student’s needs, as appropriate. It is not appropriate for the IEP to simply indicate, “special transportation needed,” without including the nature (reason/need) of the special transportation; and
- An explanation as to how the transporting vehicle has been specially modified to serve the needs of that student with a disability must be documented in the IEP (see exceptions below)

Exceptions (Special circumstances)

Special circumstances where transportation is Medicaid reimbursable, regardless of the type of vehicle used, are when:

- A student resides in an area that does not have school bus transportation (such as those areas in close proximity to a school) but has a medical need for transportation that is noted in the IEP and the student is traveling to or from a Medicaid reimbursable service;
- A student is transported from school or home directly to and/or from a provider in the community for the exclusive purpose of accessing an SSHSP service, (e.g., BOCES or other contracted provider), and transportation is noted in the IEP. If the student is transported to a provider located in the community and is then transported directly back to school or directly home, both one-way trips are Medicaid reimbursable.

There is no requirement that the student’s IEP contain a description of a vehicle modification when the transportation being billed to Medicaid was provided under a special circumstance listed above.

Other than the two exceptions above, transportation on a regular (unmodified) bus or other vehicle to/from school must not be billed to Medicaid.
Section 7  MEDICAID CLAIMING PROCESS

MEDICAID BILLING PROVIDER REQUIREMENTS

In order to bill for Medicaid eligible services and evaluations, the following conditions must be met:

- The school district/county must be an approved and enrolled Medicaid provider;
- The school district/county must have a National Provider Identifier (NPI);
- The attending provider must have a National Provider Identifier (NPI);
- The student must be eligible for Medicaid (have an eligible Client Identification Number (CIN));
- The school district/county must obtain parental consent to bill Medicaid (in accordance with IDEA) prior to billing Medicaid;
- The school district/county must incur a cost for the service and/or evaluation (i.e., the school district/county must not bill Medicaid for a service and/or evaluation that is paid partially or in full by Federal funds);
- Provider Agreements and Statement of Reassignments must be completed by outside contractors other than BOCES; and
- Medicaid billing providers must ensure that each service or evaluation is:
  - Medically necessary (ordered/referred by a Medicaid qualified provider);
  - Documented (evaluation report, session note, MAR, or transportation log);
  - Provided by a Medicaid-qualified provider; and
  - Included in the IEP.
Section 7 MEDICAID CLAIMING PROCESS

SSHSP BILLING/CLAIMING GUIDANCE

I. Documentation necessary to bill Medicaid (kept on file)
   - Provider Information:
     • Acceptable Medicaid Enrollment status for Ordering/Referring Practitioners
     • Certification/Licensure of all servicing/attending providers (see Provider Qualifications and Documentation Requirements on pages 37 and 38)
     • “Under the Direction of” (UDO) documentation, if applicable (see UDO explanation/requirements on pages 23-24)
     • Provider Agreement and Statement of Reassignment (completed by outside contractors)
   - Student Information:
     • Medicaid-eligible student
     • Referral to the CSE/CPSE
     • Individualized Education Program (IEP)
     • Parental consent to bill Medicaid
     • Referrals or written orders for services as required
     • Special Transportation (medical need must be documented in IEP)

II. Provision of Service:
   - Service must be medically necessary and
     • Documented in IEP
     • Ordered/referred by a Medicaid-enrolled practitioner acting within his/her scope of practice (exceptions found on pages 40 and 46)
     • Provided by a Medicaid qualified provider
     • Provided “Under the Direction of” (UDO) or “Under the Supervision of” as applicable

III. Each encounter must have the following documentation:
   • Student’s name
   • Specific type of service provided
   • Whether the service was provided individually or in a group (include actual # in group)
   • The setting in which the service was rendered (school, clinic, other)
   • Date and time the service was rendered (length of session; record start and end times)
   • Brief description of the student’s progress made by receiving the service during the session
   • Name, title, signature, and credentials of the person furnishing the service and signature/credentials of directing/supervising clinician as appropriate

IV. Claims submitted to Medicaid must:
   • Be supported with documentation from Sections I, II and III as required
   • Include the appropriate Current Procedural Terminology (CPT) code(s) (see Appendix A for SSHSP CPT codes) and number of units for each CPT code assigned by the provider(s) who furnished the service
   • Include procedure code modifier for physical, occupational, and speech therapy (GN, GO, GP)
   • Include the appropriate 4-digit rate code
   • Include an appropriate ICD-10 code(s)
   • Include ordering/referring provider NPI
   • Include attending provider NPI
   • Include billing provider NPI
   • Include student’s Medicaid client identification number (CIN) and other demographics

• Billing provider NPI |
MEDICAID CLAIMING PROCESS

School District and County Responsibilities

Direct claiming to the State Medicaid Agency

School districts and counties are authorized to submit claims directly to the State Department of Health’s Medicaid Management Information System (MMIS). School districts and counties may direct bill by:

- Using the Electronic Provider Assisted Claim Entry System (ePACES) or eMedNY eXchange.
- Contracting with a Medicaid Service Bureau (MSB) for claims submission.

CSRA is the vendor for the State Department of Health’s Medicaid Management Information System (MMIS), eMedNY. To send or receive electronic claim information through eMedNY, providers need the following:

- ETIN (Electronic Transmitter Identification Number)
- Certification Statement – updated annually
- Trading Partner Agreement
- User ID and Password
- Electronic Remittance/PDF Remittance Request Form (to receive 835 or PDF remittance)

Forms are available at - https://www.emedny.org/info/ProviderEnrollment

The eMedNY Call Center is available to assist with provider questions (800) 343-9000. eMedNY Provider Services Regional Representatives are available throughout state - to request training contact the eMedNY Call Center. Seminars and Webinars available on eMedNY Training page at https://www.emedny.org/training/index.aspx

An ePACES Claim Quick Reference Guide has been developed for the SSHSP and is available online at: http://www.oms.nysed.gov/medicaid/billing_transition/sshsp_epaces_claim_quick_reference_guide_oct_24_2016.pdf.

Direct claiming enables LEAs to submit for reimbursement in “real time”. Processing of the claim will begin immediately upon submission to eMedNY. Direct submission of claims allows any necessary action on the part of the school district or county to take place timely when or if the claim requires an adjustment. Timely claims processing will result in fewer claims being time barred.

It should be noted that, while school districts/counties may utilize the services of a vendor to assist in submitting to Medicaid school supportive health services claims, it is the responsibility of the school district/county:

- To ensure the vendor is approved as a Medicaid Service Bureau (MSB);
- To be aware of the services provided by the MSB;
- To be aware of the cost of using vendor services;
- To be aware of the vendor’s billing documentation retention policies;
- To know when the vendor will commence providing services; and
- To keep current on NYS policies regarding direct billing and transitioning to direct billing.
IDENTIFYING MEDICAID ELIGIBLE STUDENTS

School districts and counties must identify a student’s Medicaid client identification number (CIN) and verify eligibility exists for the date(s) of service being billed to Medicaid.

School districts and counties have opportunities to obtain a student’s CIN including but not limited to the following:

- Request the student’s CIN when requesting Parental Consent; record the CIN on the Parental Consent Form.
- Request that Medicaid cards are brought to CSE/CPSE meetings.
- If parental consent to bill Medicaid has been granted:
  - Request that the ordering practitioner include the student’s CIN on written orders/referrals for SSHSP services when they have that information in their patient records.
  - Retrieve CIN from previous billing records or web reports.
  - Explore opportunities to work with local Social Services or Medicaid Offices to identify students’ CINs.

The SED and DOH are pursuing a systems project that would create in a limited matching process to identify a student’s CIN based on demographic data (exact matches). This future limited matching process would be intended to supplement, not supplant, the steps SSHSP providers must now take themselves to obtain CINs and to ensure they have current eligibility information for students receiving SSHSP services. Additional information will be provided when available.

To inquire about a student’s eligibility status, Medicaid providers, including school districts and counties, must have a client identification number (CIN) and parental consent. The three mechanisms a school district or county can utilize to verify Medicaid eligibility with a CIN are:

- ePACES: Free Internet-based application
- Audio Response Unit: (touch-tone telephone method) 1-800-997-1111
- Alternate access: Batch and Real-time 270/271 Eligibility Inquiry & Response
EXCEPTIONS TO SCHOOL DISTRICTS CLAIMING MEDICAID REIMBURSEMENT FOR CERTAIN ELIGIBLE SERVICES

A school district may claim Medicaid reimbursement for any eligible SSHSP service included in a student’s IEP provided by the school district to any student with a disability with the following exceptions:

Intermediate Care Facilities

If the New York State Office for People with Developmental Disabilities (OPWDD) places a child in an Intermediate Care Facility (ICF) in your school district, the school district may not claim Medicaid reimbursement for any related services provided to these students since the SED reimburses 100% of the costs to educate these children including transportation. SED claims the Medicaid reimbursement for these services. However, the school district may claim reimbursement for any evaluations provided to these students.

NOTE: OPWDD has converted some ICFs residences to Individual Residential Alternatives (IRAs) or initially opened a new residence as an IRA. If a child resides in an IRA, the school district is entitled to claim Medicaid reimbursement for all eligible services provided to that child.

A listing of Intermediate Care Facilities (ICF) and Community Residence Programs (CRP) can be accessed online at:
http://www.oms.nysed.gov/medicaid/icfs_crps/

Article 28 Facilities

When a student is not placed in an Article 28 facility full time but receives only related services from the staff at that facility, the school district may claim Medicaid reimbursement for these services. The Article 28 facility may not.

Certain Article 28 facilities may claim Medicaid reimbursement for students placed full time in the facility.

Other than the above exceptions, if a school district pays for the delivery of eligible services, they may claim Medicaid reimbursement. If you have any questions please contact the Medicaid Unit at 518-474-7116 or at MedinEd@nysed.gov.
APPENDIX A
Preschool/School Supportive Health Services Program (SSHSP)
Claiming Methodology and Procedure Codes

BILLING METHODOLOGY

According to SPA #09-61, effective September 1, 2009, all SSHSP services will be reimbursed using an encounter-based claiming methodology, based on fees established by the Department of Health.

Except for special transportation, fees have been set at 75% of the 2010 Medicare fee schedule for the Mid-Hudson Region. Payment for special transportation services was set based on a statistically valid cost study that was conducted in 1999 to establish round trip transportation rates. These rates were trended forward based on changes in the Consumer Price Index (CPI). The round-trip rates were then converted to one-way rates.

All SSHSP providers will now bill on an encounter-based claiming methodology, using the select list of Current Procedural Terminology (CPT) codes that begins on page 62. CPT codes are numbers assigned to services practitioners may provide to a patient including medical, surgical and diagnostic services. CPT codes are then used by insurers to identify the service provided and ultimately the reimbursement rates. Since CPT codes are used nationally, they ensure uniformity, while adding a level of precision.

CPT codes are developed, maintained and copyrighted by the American Medical Association (AMA). As the practice of health care changes, new codes are developed for new services, current codes may be revised, and old, unused codes are discarded. Thousands of codes are in use, (over 14,000) and are updated annually. Development and maintenance of these codes is overseen by editorial boards at the AMA. DOH in coordination with SED has developed a list (just over 100 codes) that is available for SSHSP claiming.

CPT codes are either timed or untimed. Timed codes require the entry of units. When the practitioner chooses a code, the number of units must also be indicated. For example, if the physical therapist provided a service (CPT code 97140) and the session lasted 30 minutes, two units would be billed. Untimed codes are used on a one-per-session/per day basis.

With one exception, providers should not report more than one physical medicine and rehabilitation therapy service for the same 15-minute time period. The only exception involves a “supervised modality” defined by CPT codes 97010-97028 which may be reported for the same 15-minute time period as other therapy services.

For more information on the use of CPT codes and the claiming parameters, please contact your individual professional organizations.

APPENDIX B
ABBREVIATIONS, ACRONYMS, AND DEFINITIONS

ARTICLE 28 - Article 28 facilities refer to "hospitals" which are established, operated, and regulated under Public Health Law Article 28. The term "hospital" is defined broadly and includes acute care or general hospitals, nursing homes, diagnostic and treatment centers, and free-standing ambulatory surgery centers.

CENTERS FOR MEDICARE AND MEDICAID SERVICES - is a federal agency within the United States Department of Health and Human Services (DHHS) that administers the Medicare program and works in partnership with state governments to administer Medicaid.

CODE OF FEDERAL REGULATIONS - are Federal regulations that define Medicaid rules and regulations.

CSRA - is the current eMedNY contractor for the New York State Medicaid Program.

CURRENT PROCEDURAL TERMINOLOGY - is a listing of descriptive terms and five-digit, numeric codes for reporting medical services and procedures performed by healthcare professionals.

eMedNY - is the name of the New York State Medicaid program claims processing system.

EARLY AND PERIODIC SCREENING, DIAGNOSIS, and TREATMENT - is a program for Medicaid-eligible recipients under the age of twenty-one (21); EPSDT offers free preventive health care services such as screenings, well-child visits, and immunizations; if medical problems are discovered, the recipient is referred for further treatment.

FILE TRANSFER PROTOCOL - is a standard network protocol used to exchange and manipulate files over a TCP/IP-based network, such as the Internet.

HEALTH INSURANCE PORTABILITY AND ACCOUNTABILITY ACT - the HIPAA privacy regulations require health care providers and organizations, as well as their business associates, develop and follow procedures that ensure the confidentiality and security of protected health information (PHI) when it is transferred, received, handled, or shared. This applies to all forms of PHI, including paper, oral, and electronic etc. Furthermore, only the minimum health information necessary to conduct business is to be used or shared.
APPENDIX B

ABBREVIATIONS, ACRONYMS, AND DEFINITIONS

**INDIVIDUALIZED EDUCATION PROGRAM** - is the IDEA required educational program to be provided to a child with a disability and refers to the written document that describes that educational program.

**INDIVIDUALIZED HEALTH CARE PLAN** - The IHCP is a written document that outlines the provision of student healthcare services intended to achieve specific student needs.

**INDIVIDUALS WITH DISABILITIES EDUCATION ACT** - is a law ensuring services to children with disabilities throughout the nation. IDEA governs how states and public agencies provide early intervention, special education and related services.
