b. General Administrative Percentage Allocation
   i. Direct Medical Service All Other Cost Pool: Apply the General Administrative
time applicable to the Direct Medical Services percentage from the Random
Moment Time Study (Activity Code 10). The direct medical services costs
and time study results must be aligned to assure appropriate cost allocation.

The formula below details the Direct Medical Percentage (Activity Code 4.b) with the
applicable portion of General Administration (Activity Code 10) reallocated to it. The same
calculation is completed for the Direct Medical Service Therapy and Direct Medical Service All
Other cost pools.

\[ \text{Direct Medical Service Percentage} = \frac{D + \left( \frac{D}{A-R-U} \times R \right)}{A} \]

4. IEP Medicaid Eligibility Ratio: A district-specific IEP Ratio will be established for
each participating school-district. When applied, this IEP Ratio will discount the Direct
Medical cost pool by the percentage of IEP Medicaid students. The IEP ratio will be
based on child count reporting of students that had a direct medical service in an IEP
during the school year [required for Individuals with Disabilities Education Act (IDEA) on
the first Wednesday in October of the Fiscal Year] for which the report is completed. For
example, for the cost reporting period covering July 1, 2012 through June 30, 2013, the
IEP Ratio will be based on the [student] count of students with an IEP at any time
during the from July 1, 2012 through June 30, 2013 school year [October 3, 2012]. [The
names and birthdates of students with an IEP with a direct medical service will be
identified from the Student Count Report as of the first Wednesday in October and
matched against the Medicaid eligibility file to determine the percentage of those that
are eligible for Medicaid.] The numerator will be the number of Medicaid eligible IEP
students in the LEA for whom at least one claim was processed through the MMIS for
the year for which the report is completed [with a direct medical service, as outlined in
their IEP]. The denominator will be the total number of students in the LEA with an IEP
with a direct medical service as outlined in their IEP at any time during the school year
reporting period. Direct medical services are those services billable under the SSHS
program.

The IEP Medicaid Eligibility Ratio will be calculated on an annual basis using student
counts, as described above, [of the first Wednesday of October] and MMIS data for the
fiscal year for which the cost report is completed.

H. Cost Reconciliation Process

Once all interim claims (CPT/HCPCS claims) are paid, the State will calculate the final reconciliation and settlement. There will be separate settlements for every Medicaid provider. The cost reconciliation process will be completed after the reporting period covered by the annual SSHSP Cost Report. The total CMS-approved, Medicaid allowable scope of costs based on CMS-approved cost allocation methodology procedures is compared to the provider’s Medicaid interim payments for school health services delivered during the reporting period as documented in the MMIS and CMS-64 form, resulting in cost reconciliation.

For the purposes of cost reconciliation, the State may not modify the CMS-approved scope of costs, the CMS-approved cost allocation methodology procedures, or its CMS-approved time study for cost-reporting purposes. CMS approval will be sought prior to any modification to the scope of cost, cost allocation methodology procedures, or time study for cost-reporting purposes.

I. Cost Settlement Process

For services delivered for a period covering July 1st through June 30th, the annual SSHSP Cost Report is due on or before December 31st of the same year. The final reconciliation will occur prior to the 24th month following the end of the fiscal period to ensure all claims are paid through MMIS for the dates of service in the reporting period.

As part of the final cost reconciliation and cost settlement DOH will conduct an analysis of the Medicaid payments to ensure compliance with the requirements for efficiency and economy as outlined in the Social Security Act section 1902(a)(30)(A) and LEAs found to be out of compliance may be subjected to a corrective action plan.

If final reconciled settlement payments exceed the actual, certified costs of the provider for SSHSP services to Medicaid clients, an amount equal to the overpayment will be returned. Overpayments will be recouped within one year from the date that the overpayment was discovered.

If actual, certified costs of a provider for SSHSP services exceed the interim claiming, the DOH and the providers will share in the retention of the incremental payment. The final settlement will be an accounting adjustment that is made off-line for each provider. The State will report the final settlement that is paid to each provider on the CMS-64 form for the quarter corresponding to the date of payment.

J. Sunset Date

Effective for dates of service on or after October 1, 2011 through June 30, [2016] 2017; the State will be able to process cost reconciliations and cost settlements on all cost reports completed for the fiscal years covering dates of service through June 30, [2016] 2017.
