Re: CFRS v35 CFR-1 validation error message when entering data in programs 9200-9229 and 9300-9343.

Dear CFR filers,

SED is aware of an issue with the current version of the Consolidated Fiscal Reporting Software (CFRS), v35, where the software is giving a validation error message on the validation screen when the filer is attempting to report data under programs 9200-9229 and 9300-9343. The validation will not allow the filer to assign a DCN to the CFR if schedule CFR-1, Line 13c – All Other Units of Service is not greater than zero. SED will be correcting this validation going forward; unfortunately, the correction will not occur until the next CFRS version is released.

If you receive this validation error message, SED advises the filer to enter a '1' on CFR-1 Line 13c in order to satisfy the software validation. Please note, this work-around is valid for programs 9200-9229 and 9300-9343 only.

If you have any further questions, please contact your SED rate setting accountant. A list of assigned accountants can be found using the following link.
